

# ПРОЦЕС РОЗРОБКИ ПРОГРАМНОГО ЗАБЕЗПЕЧЕННЯ НА ПРИКЛАДІ REST API СЕРВЕРУ

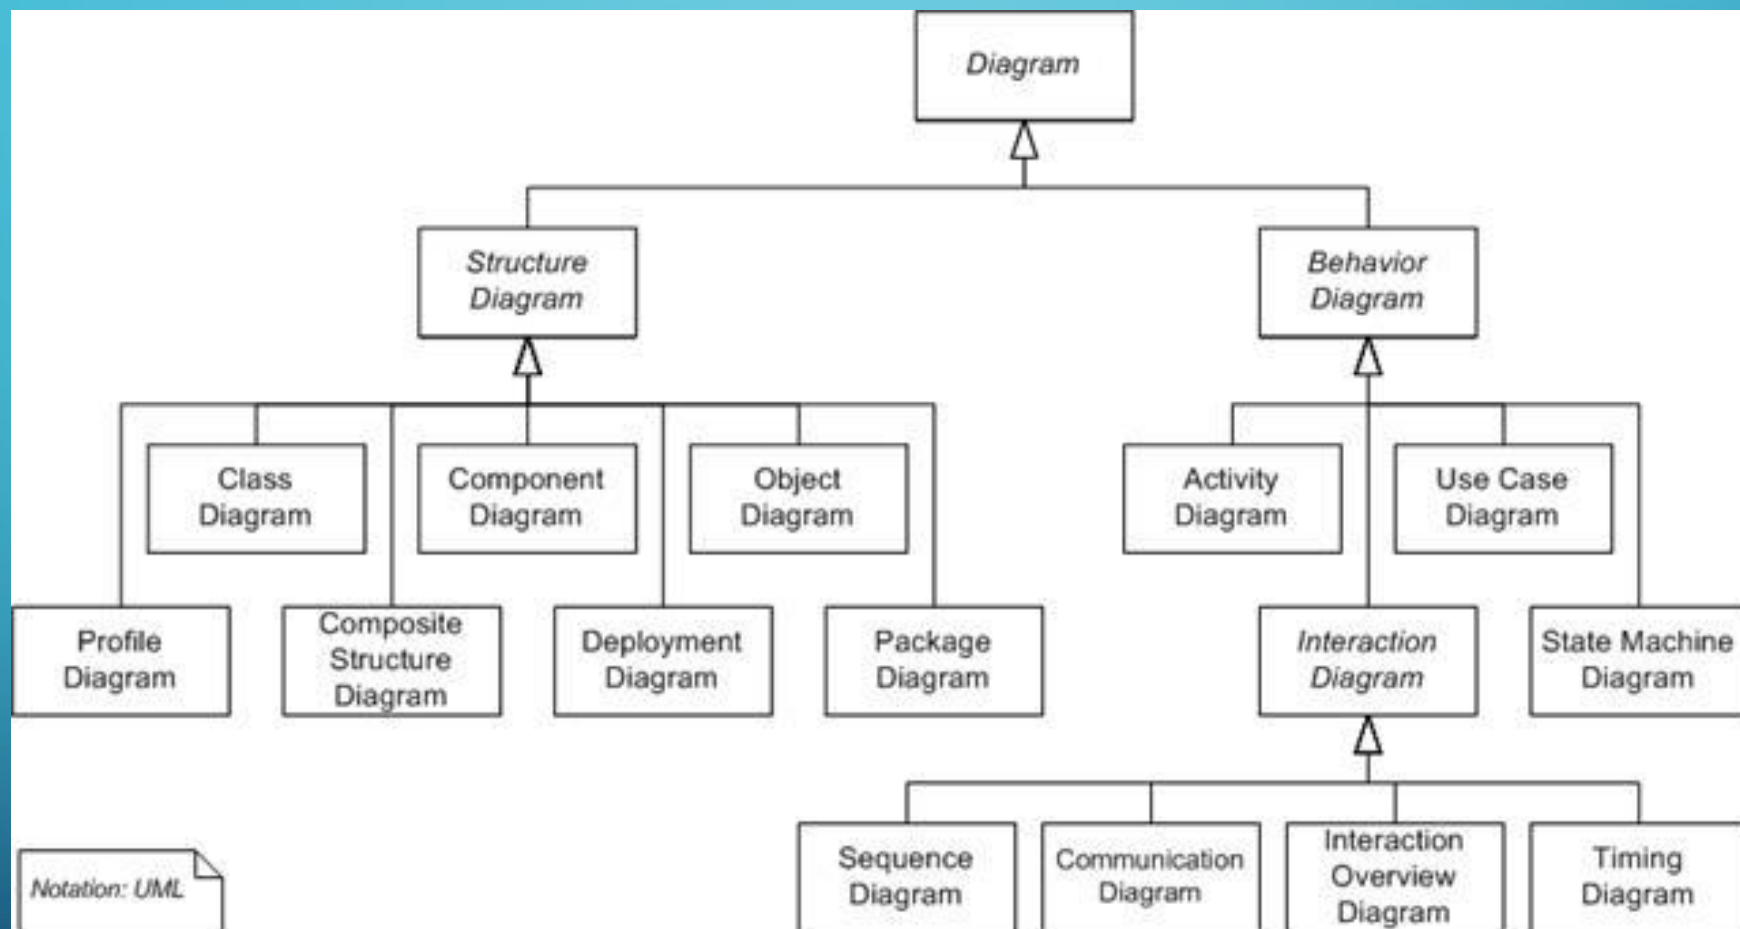

## ПЕРЕВАГИ

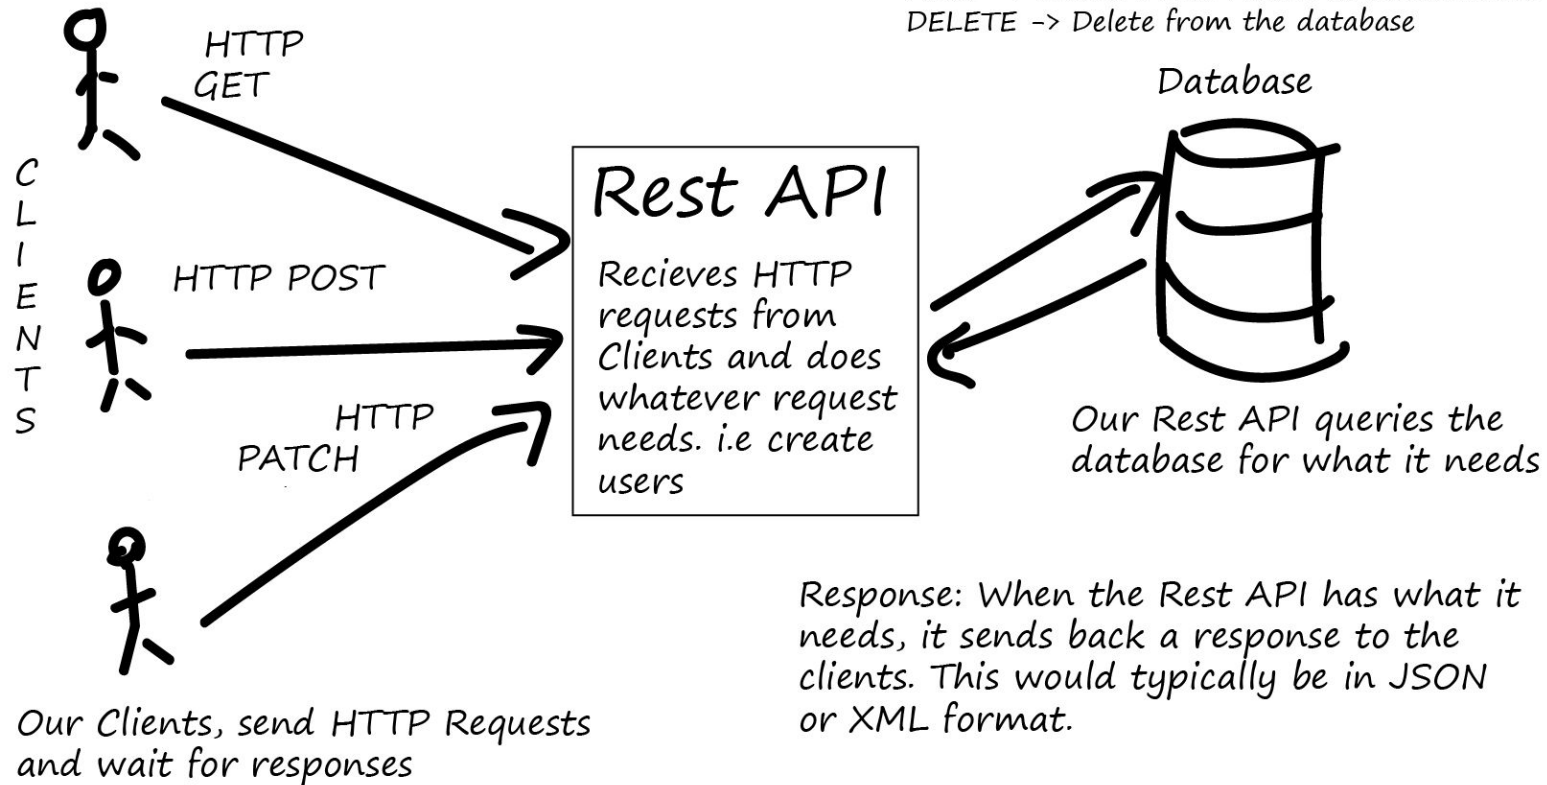

- можуть використовуватися як документація;
- рефакторинг коду без ризику його зламати;
- при внесенні змін в добре протестований код, ризик появи нових помилок значно нижчий;
- сприяє більш модульному і гнучкому коду.

## НЕДОЛІКИ

- потрібно більше часу на розробку і підтримку;
- тести є джерелом додаткових витрат;
- існують завдання, які неможливо вирішити тільки за допомогою тестів;
- модульні тести, пишуться тими, хто пише тестований код. Якщо розробник неправильно висунув вимоги до застосунку, то тест, і тестований модуль будуть містити помилку.
