2000

Be yourself - that's what it has become fashionable in the 2000s. Fashion 2000 completely wiped out from the style of things that dressed the last two decades - in the 80s and 90s!

- The 20th century came to an end, and we received the fashion of the early 21st century. Of those decades was much easier to judge, there was held a fashion for a long time, but probably due to the advent of the new century, things started to gain momentum, including fashion. In the 2000s, fashion was replaced from year to year, and keep up with all the trends have been quite difficult. Early 2000s remember the abundance of nudity, which is brought into fashion pop singer, bare bellies with having piercing, legs open. Next it was the jeans flared at high landing, which eventually changed skinny jeans at the hips. Also in the 2000s actively labored style of "minimalism", which is popular to this day. For minimalism characteristic traits such as simplicity of form, clarity of the silhouette, a small amount of accessories and various parts. The color palette is mostly bright, pastel. In general, the 2000s can be called the era of "artificial beauty" - in the early 2000s began to open the expensive salons for hair extensions, increasing the number of plastic surgery clinics.

In 2003, it dominated the trend in military style, and in 2004 began the revival of femininity: a triumphant return to the podium artificial fur, graceful accessories from crocodile leather, vintage brooches and bags, original earrings, classic tweed suits and form-fitting silhouettes.

2005

2005 - year of femininity. And if in the bygone year it only strengthened its position, now it regally ascended the throne. Therefore, dresses with floral prints of the lung tissue left over from last summer, will be useful to you in the new year.

On the catwalks of spring 2005 obviously influence the 50s when femininity was at the forefront. Moreover, this femininity is often grotesque: pointed seductive dresses, cropped pants, skirts "a la fairytale princess" hair and makeup in the style of Barbie dolls.

Perfect alternative to skirts this year will become shorts. They flashed on the catwalks last summer, but the buyers interest in them was small, so now designers such as the Miu Miu, Balenciaga and Clements Ribeiro made them more feminine and seductive.

2010

- most fashion plates try to be for more natural beauty, but not without exceptions. Fashion 2010th-it the absolute mixing of all styles which were before. Skirts on a high waist from 50th, large accessories and glasses from 60th, 70th complimented with style of «casual» us, wide jackets from 80th, which only-only entered anew into a fashion, jean shorts and jeans on a high waist from 90th and short topy of 2000th. A fashion regenerates anew, but has the additions, sparkle, somewhere elegance, somewhere ...
