Исторические напоминания о применении зонтов.

В Индии и в Китае зонт был символом власти

Зонт - предмет высочайшей роскоши

Применение зонтов в военных походах

Первый дождевой зонт Людовика 13

в России зонт появился в 18 веке

ЗОНТ-ГРОМОУТВОД

ЗОНТ ЗАЩИТНИК ОТ ВЕТРА И СОЛНЦА

WINDSHIELD FOLDS INSIDE UMBRELLA

AN UMBRELLA with a built-in windshield, recently patented, protects the user from driving rain but allows him a clear view ahead. Made of sections of transparent celluloid, the windshield folds inside the umbrella when not in use and automatically drops down into place when it is opened. Metal rods hinged to the umbrella ribs hold the shield in a rigid posi-

tion when in use. The device was invented by a Brooklyn, N. Y., woman who had been struck by an auto that she failed to see because an ordinary umbrella obscured her view during a rain storm.

Umbrella with transparent shield in place for use in a driving rain. The photograph at the left shows how the sections fold inside the cover when not in use
