Больше, меньше,
столько же

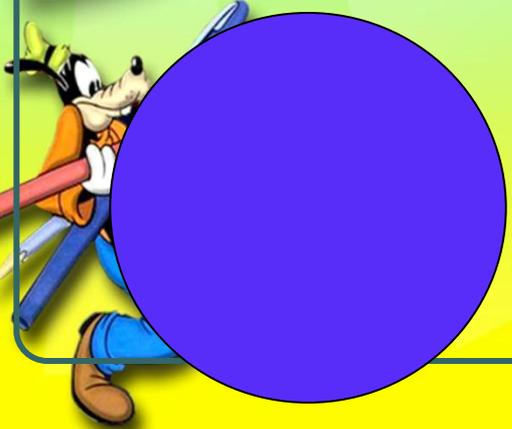

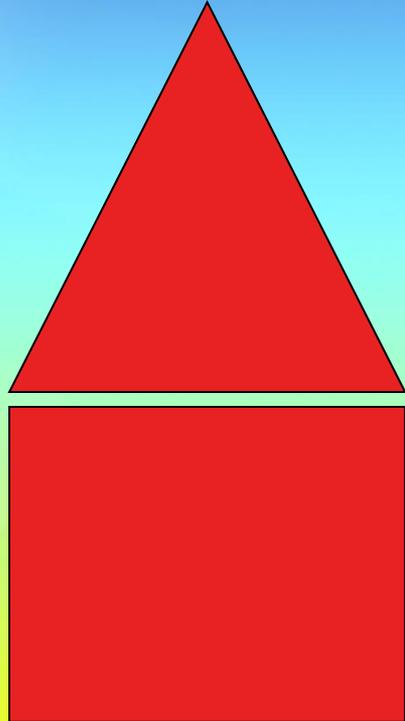

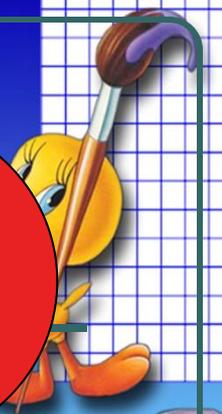

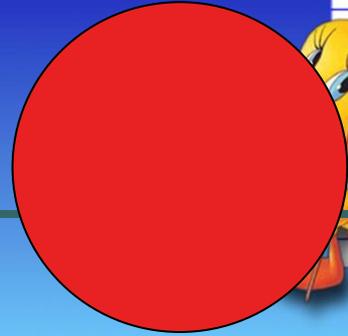

- Положите в верхней правый угол красный кружок,
- в нижний левый угол – синий,
- выложите в центре фигуру домика с красной треугольной крышей и красным квадратом в основании

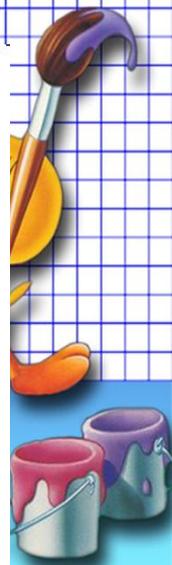

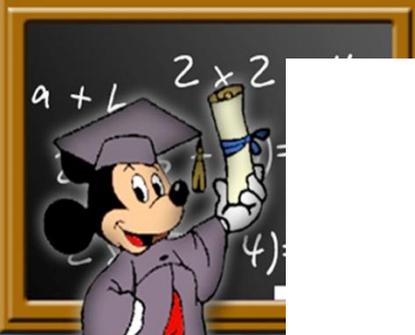

$a + L$ $2 \times 2 = 4$
 $= 16$
 $4) = 8$

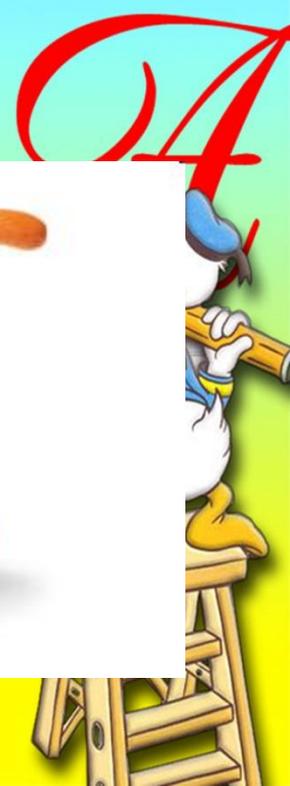

А у вас так же
получилось?

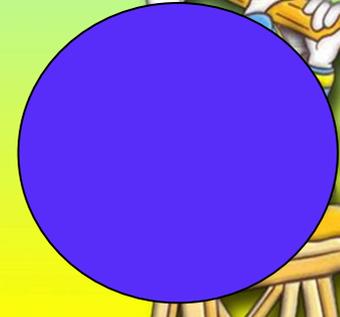

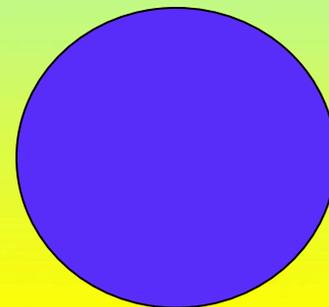

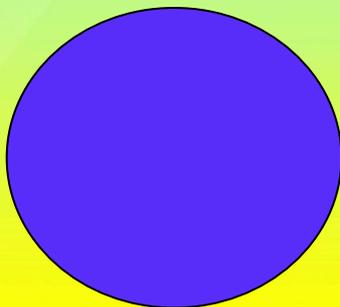

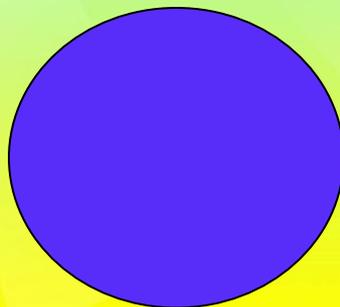

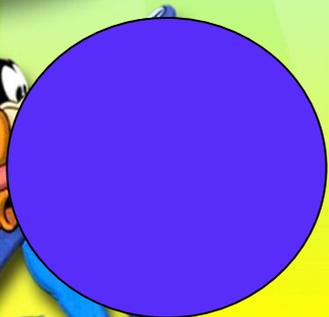

Кого больше?

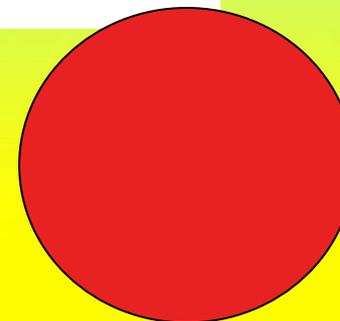

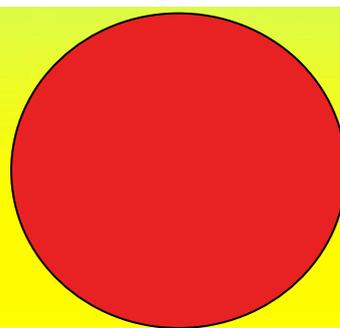

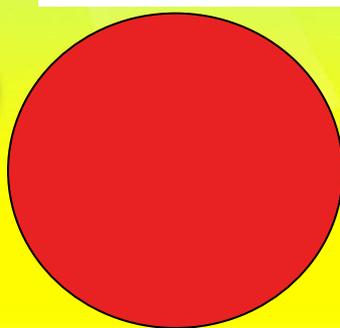

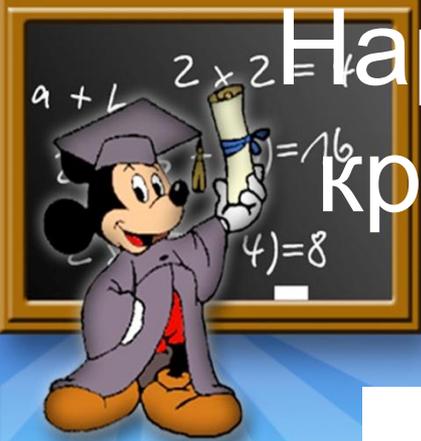

• Нарисуйте столько синих кружков, сколько на доске белочек.

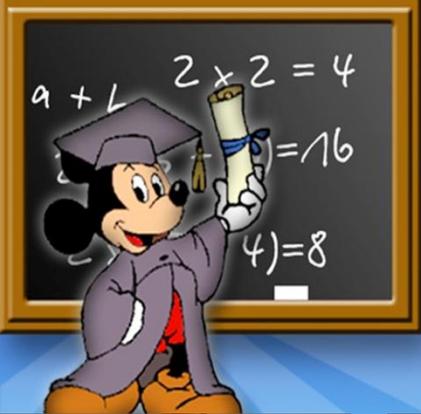

Нарисуйте столько красных кружков, сколько на доске зайчиков.

$a + L$ $2 \times 2 = 4$
 $4 = 16$
 $4) = 8$

Каких квадратов больше?

УСТАНОВИМ ПАРНОЕ СООТВЕТСТВИЕ.
