Море  
углов

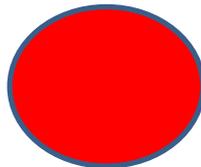

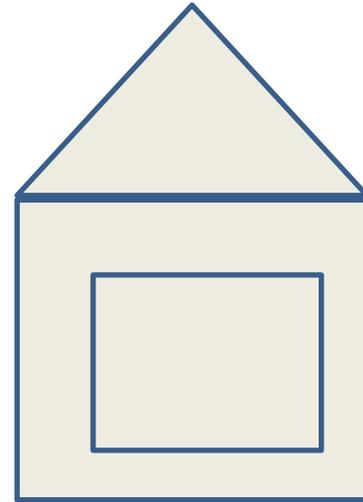

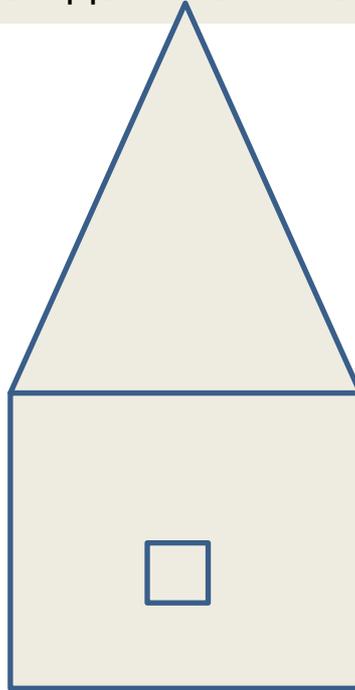

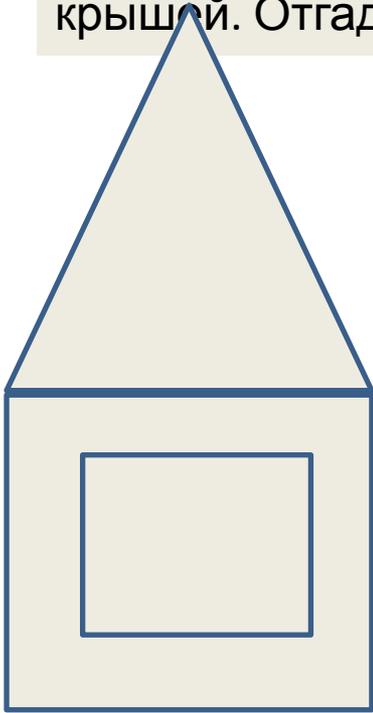

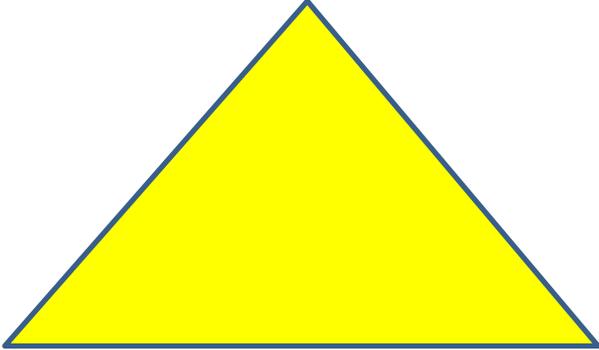

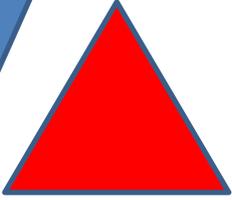

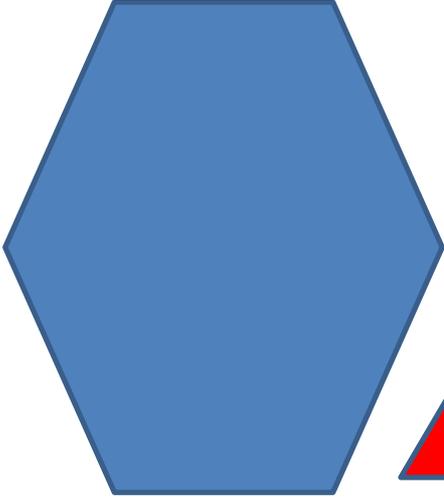

**Какая фигура пропущена?**

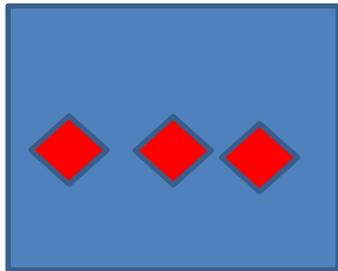

**Задача 1.** Было три фигурки: треугольник, круг и квадрат. Каждая из них жила в одном из трёх домиков: первый домик был с высокой крышей и маленьким окном, второй с высокой крышей и большим окном, третий с низкой крышей и большим окном. Треугольник и круг жили в домиках с большим окном, а круг и квадрат в домиках с высокой крышей. Отгадайте, в каком домике живет каждая фигурка?

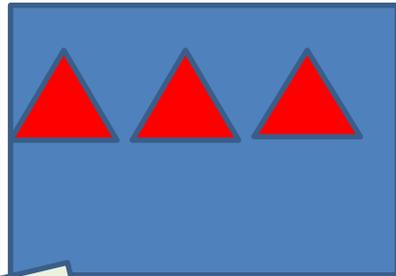

**Задача 1.** Было три фигурки: треугольник, круг и квадрат. Каждая из них жила в одном из трёх домиков: первый домик был с высокой крышей и маленьким окном, второй с высокой крышей и большим окном, третий с низкой крышей и большим окном. Треугольник и круг жили в домиках с большим окном, а круг и квадрат в домиках с высокой крышей. Отгадайте, в каком домике живет каждая фигурка?

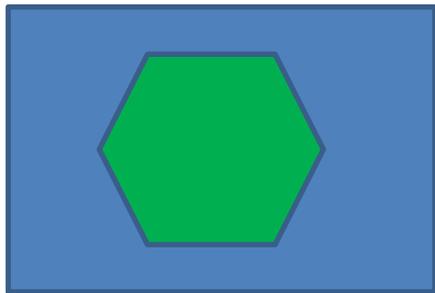

измени форму, уменьшив количество сторон у каждой фигуры на 1

уменьши количество фигур на 2

увеличь количество углов на 3 измени размер и цвет
