# ОСНОВНОЕ СВОЙСТВО ДРОБИ.

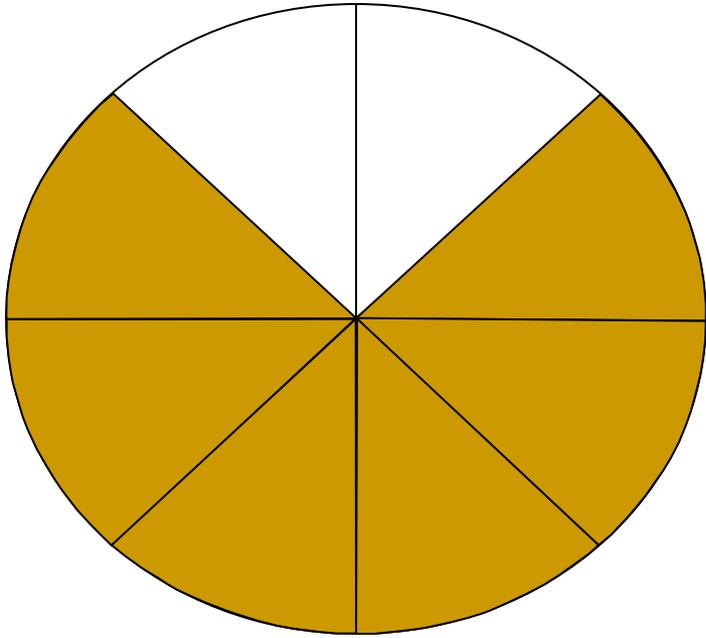

---

---

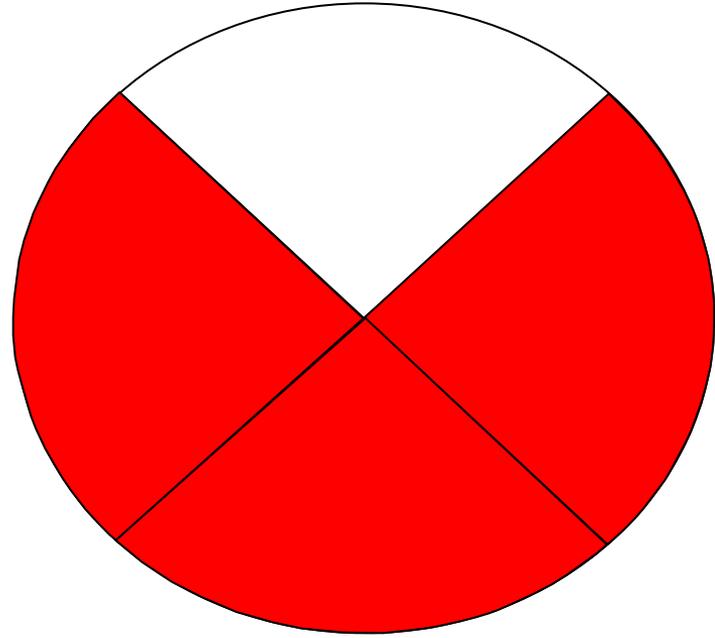

# УСТНАЯ РАБОТА:

№ 222(а,б), 226.

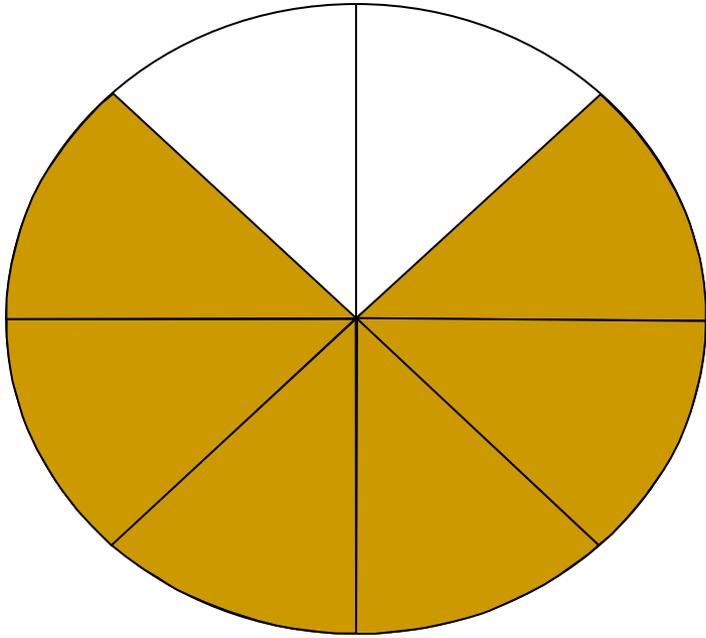

---

$$\frac{6}{8}$$

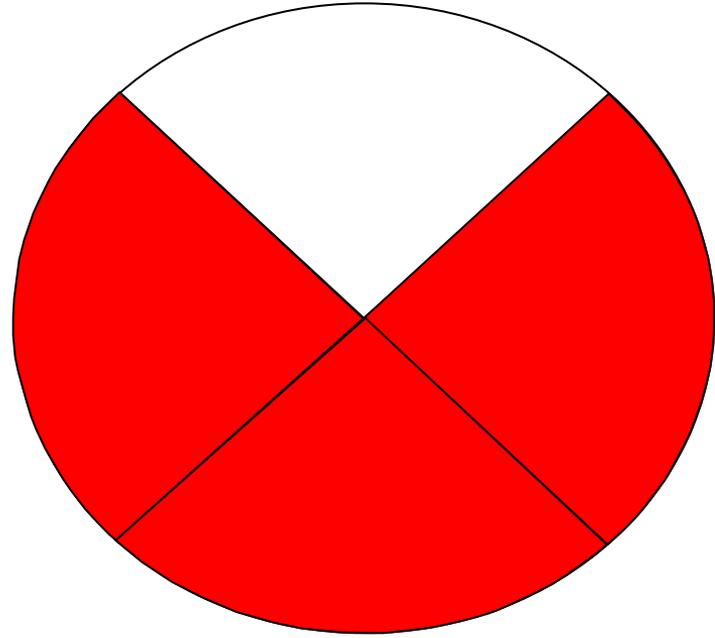

$$\frac{3}{4}$$

$$\frac{6}{8}$$

=

$$\frac{3}{4}$$

# Основное свойство дроби

$$\frac{6}{8} = \frac{3}{4}$$

Diagram illustrating the simplification of the fraction  $\frac{6}{8}$  to  $\frac{3}{4}$  by dividing both the numerator and denominator by 2. The operation is indicated by a  $\div 2$  above the fraction and a  $\div 2$  below it. Curved arrows show the division of 6 by 2 to get 3 and 8 by 2 to get 4.

$$\frac{6}{8} = \frac{3}{4}$$

Diagram illustrating the expansion of the fraction  $\frac{3}{4}$  to  $\frac{6}{8}$  by multiplying both the numerator and denominator by 2. The operation is indicated by a  $\cdot 2$  above the fraction and a  $\cdot 2$  below it. Curved arrows show the multiplication of 3 by 2 to get 6 and 4 by 2 to get 8.

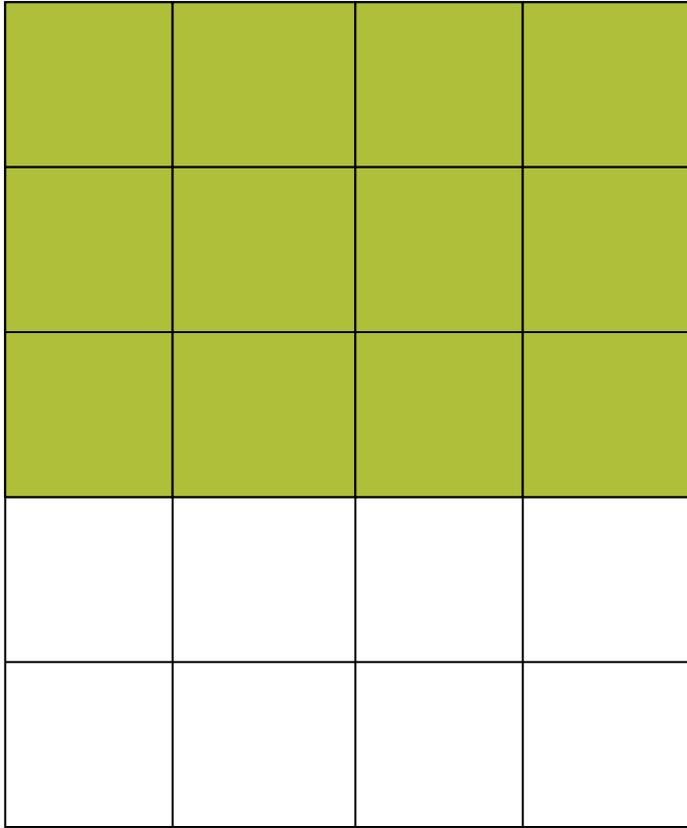

# Основное свойство дроби

- $$\frac{6}{8} = \frac{6:2}{8:2} = \frac{3}{4} ;$$

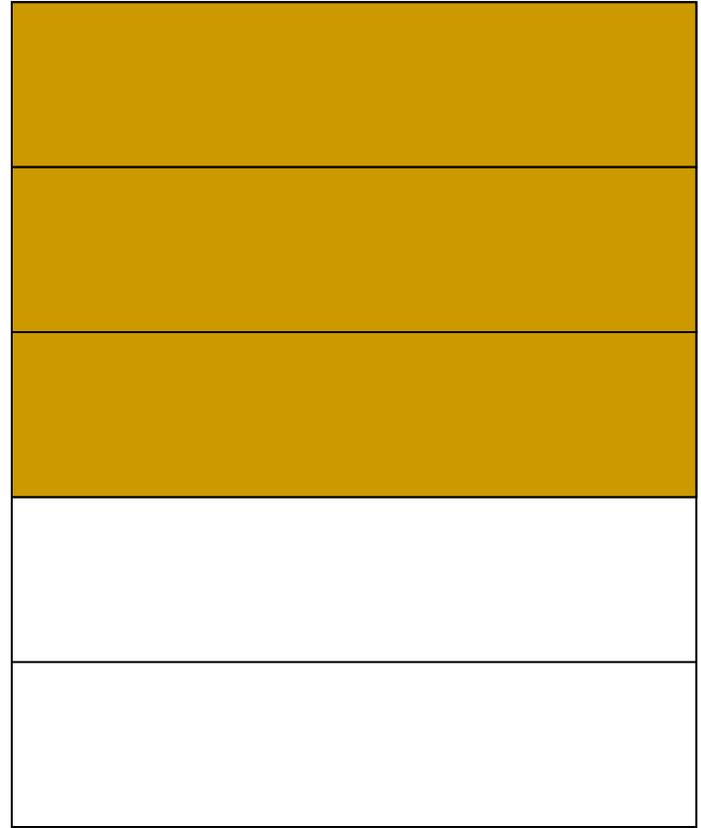

$$\frac{3}{4} = \frac{3 \cdot 2}{4 \cdot 2} = \frac{6}{8} .$$

# Основное свойство дроби

# Основное свойство дроби

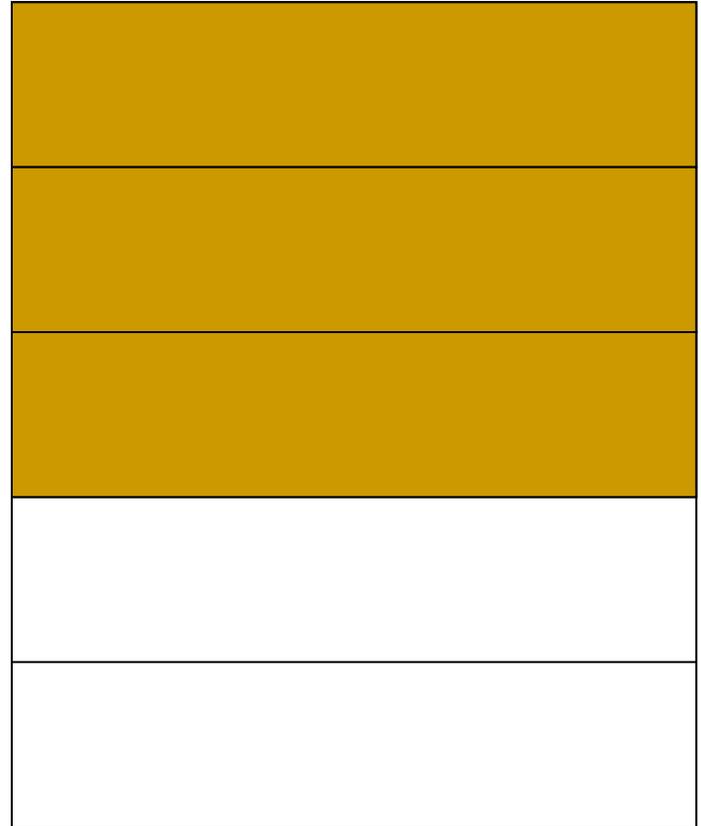

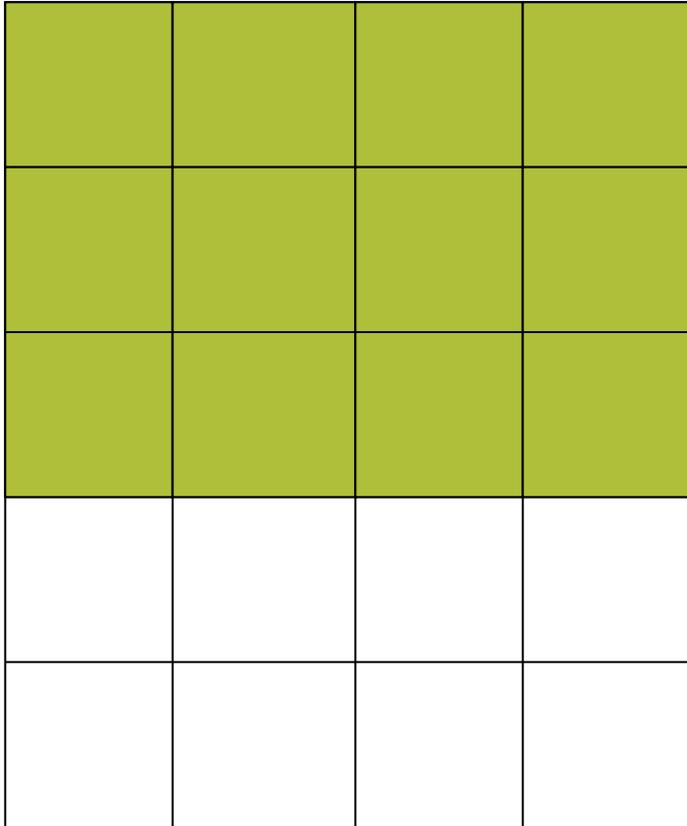

$$\frac{12}{20}$$

$$\frac{3}{5}$$

# Основное свойство дроби

$$\frac{12}{20}$$

=

$$\frac{3}{5}$$

# Основное свойство дроби

$$\frac{12}{20} = \frac{3}{5}$$

Diagram illustrating the simplification of the fraction  $\frac{12}{20}$  to  $\frac{3}{5}$  by dividing both the numerator and denominator by 4. The operation is indicated by a division symbol  $\div 4$  above the fraction and another  $\div 4$  below it. Two curved arrows connect the top and bottom of the fraction to show the division process.

$$\frac{12}{20} = \frac{3}{5}$$

Diagram illustrating the expansion of the fraction  $\frac{3}{5}$  to  $\frac{12}{20}$  by multiplying both the numerator and denominator by 4. The operation is indicated by a multiplication symbol  $\cdot 4$  above the fraction and another  $\cdot 4$  below it. Two curved arrows connect the top and bottom of the fraction to show the multiplication process.

# Основное свойство дроби

- $$\frac{12}{20} = \frac{12:4}{20:4} = \frac{3}{5} ;$$

$$\frac{3}{5} = \frac{3 \cdot 4}{5 \cdot 4} = \frac{12}{20} .$$

---

Если числитель и знаменатель дроби умножить или разделить на одно и то же натуральное число, то получится равная ей дробь.

---

**Умножьте числитель и знаменатель каждой дроби на 2.**

$$\frac{2}{3} = \frac{2 \cdot 2}{3 \cdot 2} = \frac{4}{6};$$

$$\frac{3}{5}; \frac{4}{7}; \frac{7}{10}; \frac{9}{25}; \frac{17}{100}.$$

---

**Разделите числитель и знаменатель каждой дроби на 3.**

$$\frac{3}{9} = \frac{3:3}{9:3} = \frac{1}{3};$$

$$\frac{12}{15}; \frac{9}{21}; \frac{27}{30}; \frac{45}{60}; \frac{36}{90}.$$

---

---

# ЗАКРЕПЛЕНИЕ:

1. Устно: № 211, 212(а,б), 219;
  2. № 216, 217, 221;
  3. Повторение: № 224, 231.
-

---

# ИТОГ УРОКА:

Вопросы к п.8 стр.35.

---

---

# ДОМАШНЕЕ ЗАДАНИЕ:

П.8, № 237, 239(а), 241(а),  
240(б,г);

Принести циркуль, линейку.

---

---

Спасибо за внимание.
