Скорость велосипедиста  $x$  км/ч, а скорость пешехода 4 км/ч. С какой скоростью сходятся и расходятся велосипедист и пешеход?

Скорость вертолета 200 км/ч, а скорость самолета  $y$  км/ч. Какое расстояние пролетит самолет за 3 часа? На сколько скорость самолета больше скорости вертолета?

Термин «геометрия»  
древнегреческого происхождения.

В буквальном переводе слово  
«геометрия» означает «измерение  
земли»:

**ge** – земля, **metreo** – мерить,  
измерять.

геометрические фигуры  
условились давать им имена.

фигур нужно соблюдать  
некоторые правила и уметь их  
правильно читать.
