

## №2

$6 \times 10 = 60 \text{ см}^2$  вся фигура

$3 \times 4 = 12 \text{ см}^2$  вырезанный прям

$60 - 12 = 48 \text{ см}^2$

22. Запиши два **различных** способа нахождения площади многоугольника.

**№1**

$$2*8+6*4+2*8=56\text{cm}^2$$

**№2**

$$8*10=80\text{cm}^2$$

$$6*4=24\text{ cm}^2$$

$$80-24=56\text{ cm}^2$$

**№1**

$$4*7*2+3*2=62\text{cm}^2$$

**№2**

$$7*10=70\text{cm}^2$$

$$4*2=8\text{ cm}^2$$

$$70-8=52\text{ cm}^2$$

**№1**

$$3 * 9 = 27 \text{ cm}^2$$

$$27 * 2 = 54 \text{ cm}^2$$

$$6 * 4 = 24 \text{ cm}^2$$

$$54 + 24 = 78 \text{ cm}^2$$

**№2**

$$9 * 10 - 3 * 4 = 78 \text{ cm}^2$$
