

Урок математики

1 класс

«Лабиринт чисел»

Распределите примеры на две группы

$4 + 3$

$6 + 3$

$11 - 3$

$12 - 3$

$7 + 3$

$4 + 3$

$11 - 3$

$6 + 3$

$12 - 3$

$7 + 3$

Вычитание числа 3

Как из числа можно вычитать 3?

$$7 - 3 = 4$$

1 1 1

$$7 - 3 = 4$$

2 1

1 2

ГОТОВИМСЯ ВЫЧИТАТЬ 3

Объясните, как из числа 11 и из
числа 12
вычесть 3 разными способами

3)

$$\overset{10}{11 - 1} - 2 = 8$$

$$\overset{10}{12 - 2} - 1 = 9$$

9 6

4 1

11 ~~9~~ 8

The illustration shows two characters, a boy and a girl, dressed as mechanics. The boy on the left wears a blue cap with red goggles, a yellow shirt, and blue overalls with black spots. He holds a wrench and a red-handled tool. The girl on the right wears a black cap with white goggles, a red jacket, and blue overalls with black spots. She holds a wrench. On the ground between them are a grey cylindrical part, a gear, and a small black component.

5 • 5

2 • 2

6 • 6

The diagram illustrates a number line with three points. The first point is labeled '1' on the left. An arrow labeled '+ 3' points from this point to a second point. From the second point, an arrow labeled '- 3' points to a third point. Below the second and third points are vertical columns of dots. The first column has four dots, with the number '1' in a box above the top dot. The second column has four dots, with the number '5' in a box above the top dot. The third column has four dots, with the number '2' in a box above the top dot. The number '6' is written below the bottom dot of the third column. To the right of the diagram is an illustration of two cartoon characters. The character on the left is a boy wearing a blue cap with red goggles, a yellow shirt, and blue overalls with black spots. He is holding a wrench and a screwdriver. The character on the right is a girl wearing a black helmet with white goggles, a red jacket, and blue pants with black spots. She is holding a fire hose. Various tools like a nut, a gear, and a wrench are scattered on the ground around them.
