

"Космическое путешествие"

Цель занятия:

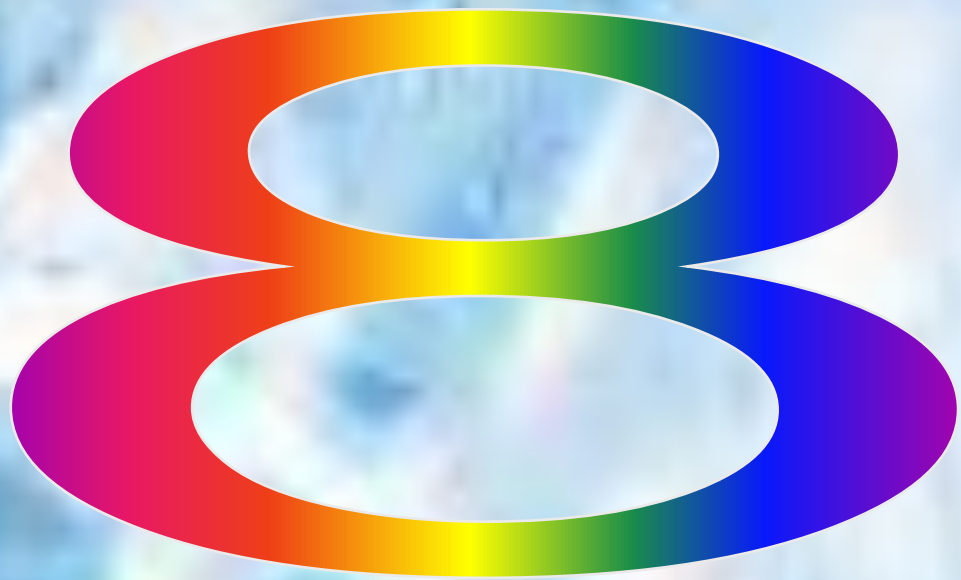

Воспитывать интерес к занятию. Продолжать знакомить с числами в пределах десяти; закреплять прямой и обратный счёт; умение ориентироваться в пространстве: справа - слева; закреплять знания о геометрических фигур; развивать мышление в решении логических задач.

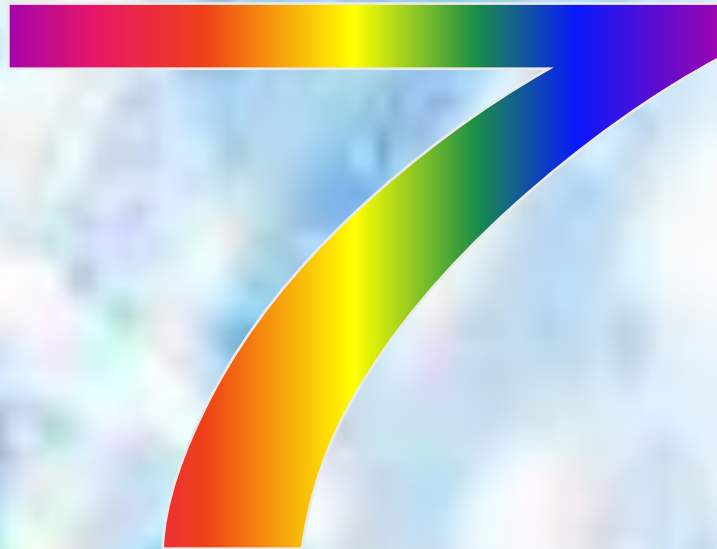

A vibrant, cartoon-style illustration of outer space. The background is a gradient of light blue and white, filled with numerous white stars of varying sizes. In the upper left, a large, detailed grey moon with several craters is prominent. To its right, the planet Saturn is depicted with its characteristic rings. In the lower left, a white rocket ship with a blue window and orange flames is shown launching from a small Earth globe. Other planets, including a blue one and a green one, are scattered throughout the scene. The overall atmosphere is bright and celebratory.
