

Урок математики 2 класс

учебник «Математика в 2-х частях» М.И.
Моро, М.И. Бантова и др.

Тема. Квадрат

Крылова Ольга Николаевна
учитель начальных классов
МОУ СОШ №2 г. Салехард

Распределите геометрические фигуры на группы.

По цвету

По форме

По размеру

По наличию углов

Начертить квадрат со стороной 9 см. Найти его периметр.

Составьте задачу по выражению и решите её.

$$100 - (25 + 15)$$

$$100 - (25 + 15) = 65 \text{ (м)}$$

Ответ: 65 м между детьми.

Сколько квадратов изображено на рисунке?

9 квадратов

У крышки квадратного стола 4 угла.
Сколько станет углов, если 1 угол отпилить?

1 вариант

5 углов

У крышки квадратного стола 4 угла.
Сколько станет углов, если 1 угол отпилить?

2 вариант

4 угла

У крышки квадратного стола 4 угла.
Сколько станет углов, если 1 угол отпилить?

3 вариант

3 угла
