

Устные и письменные
приемы сложения и
вычитания

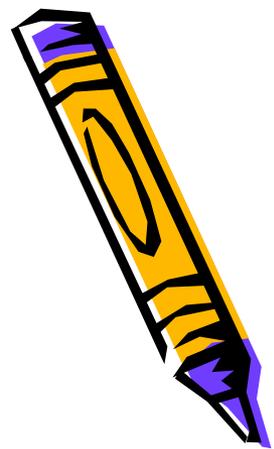

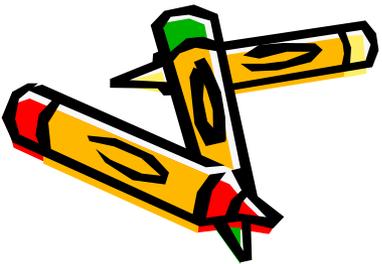

Путешествие в
Царство
математики

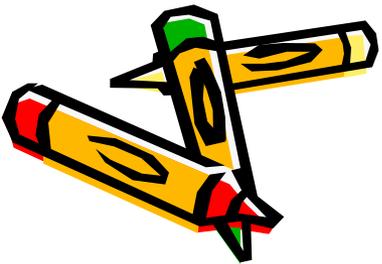

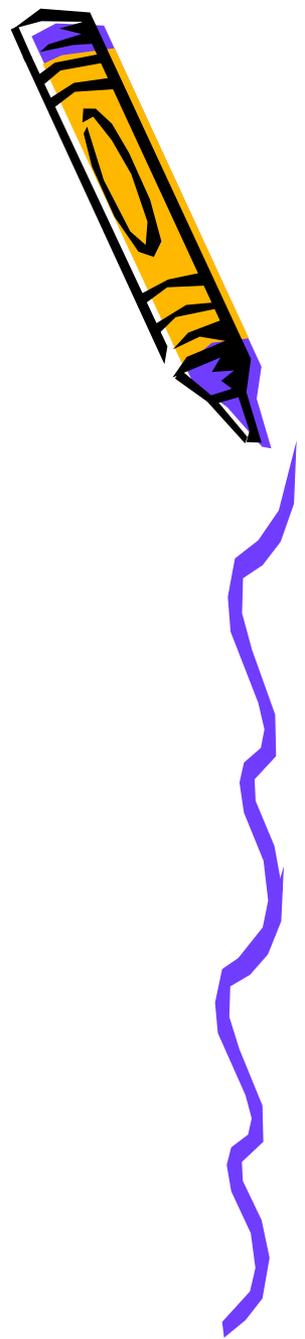

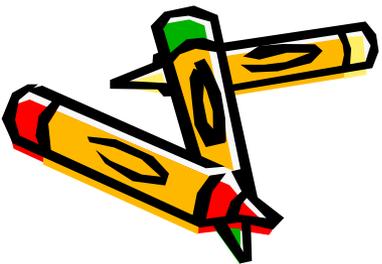

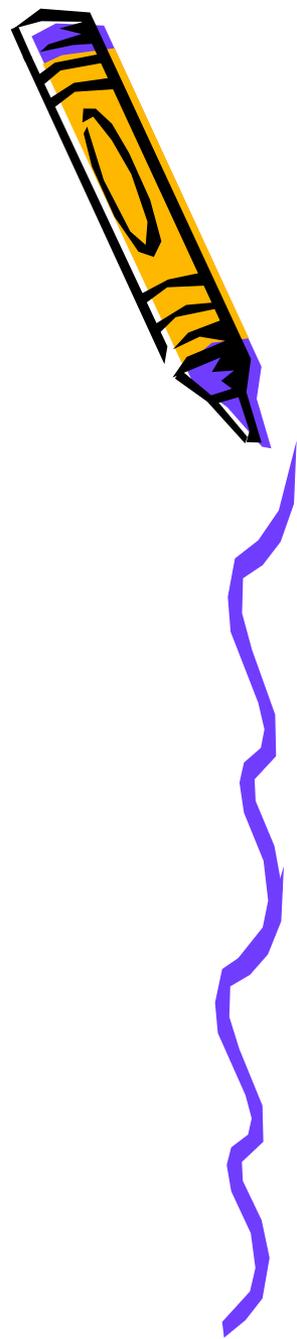

26, 22, 50, 70, 30.

Ответ: 8 рублей осталось у
Оли.

$$7 + 18 = 25$$

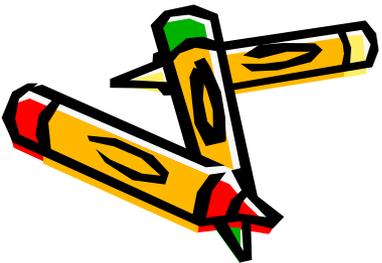

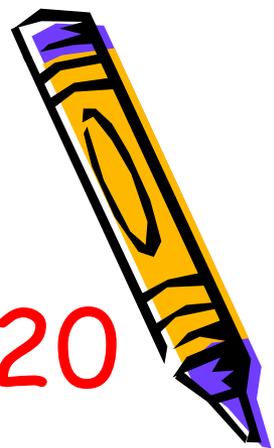

$$3 + (40 - 23) = 20$$

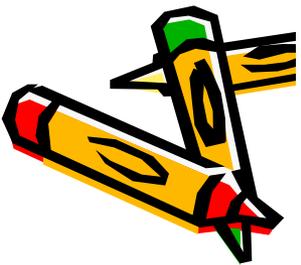

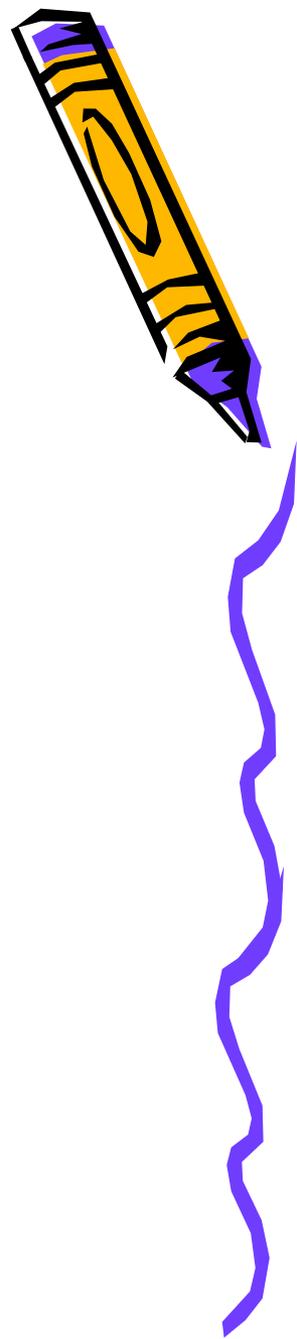

$$6 + 23 = 33$$

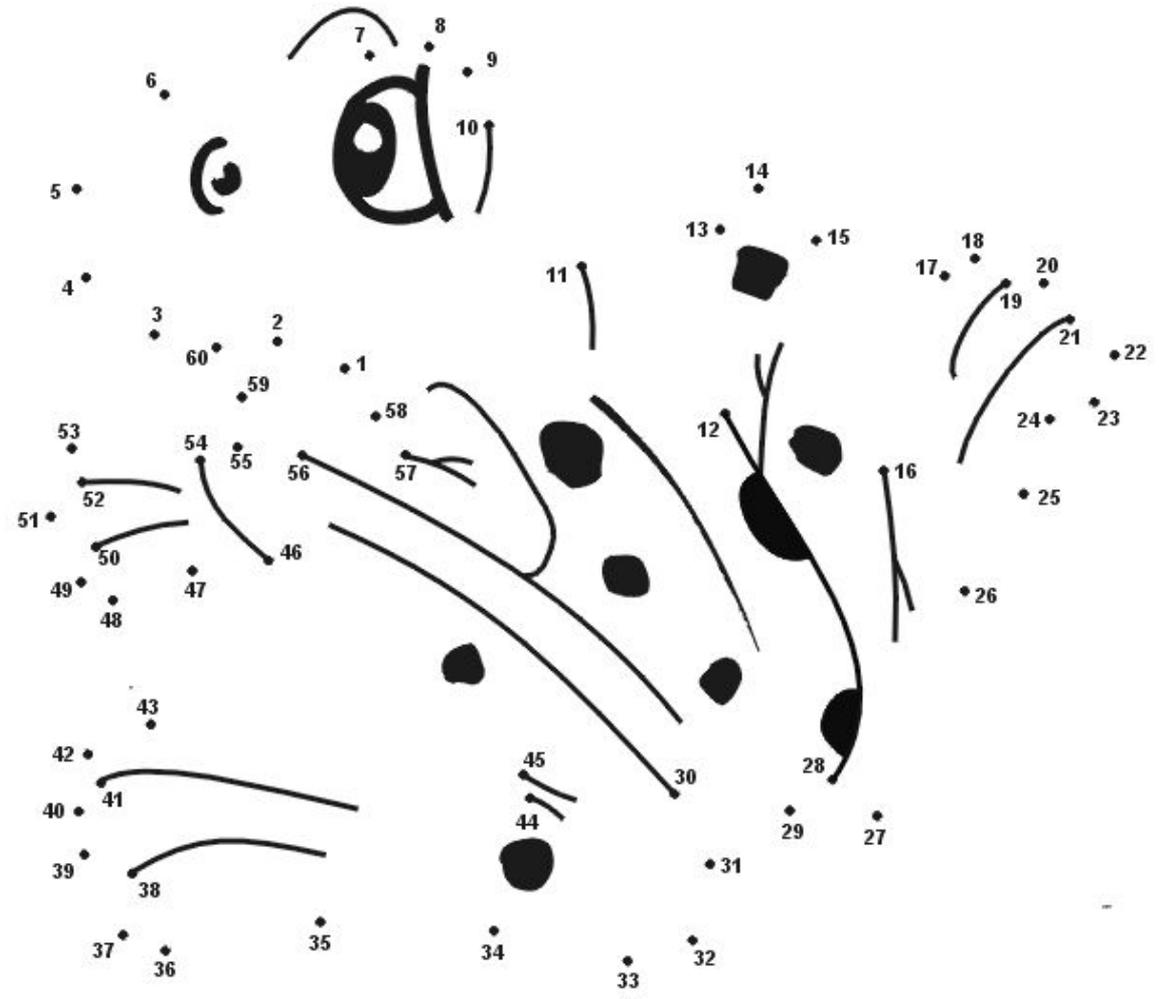

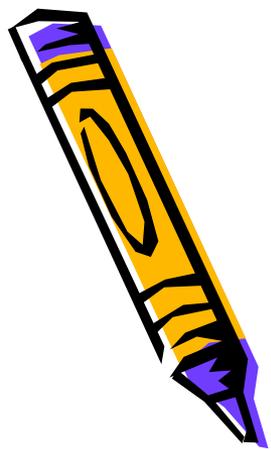

$$7 + (90 - 65) = 32$$

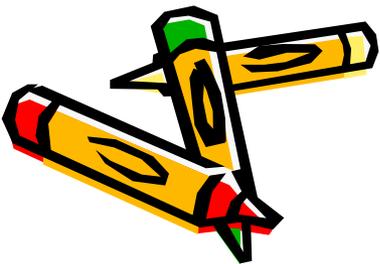

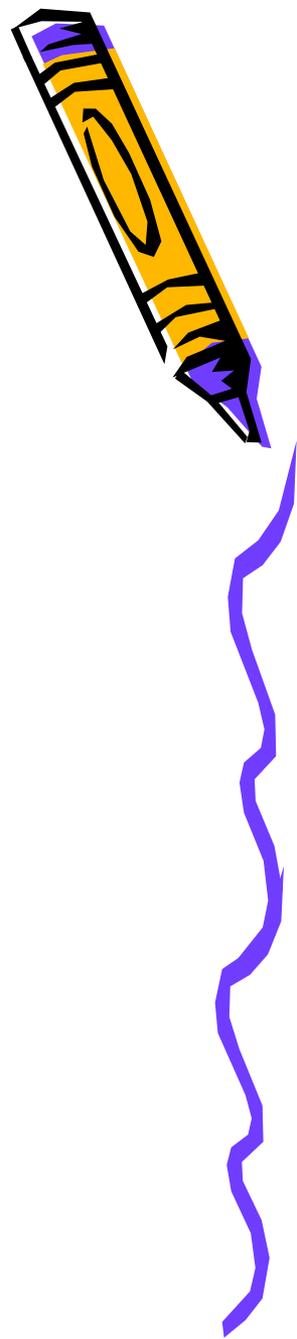

$$(6 + 46) - 20 = 32$$

$$(3 + 79) - 30 = 52$$

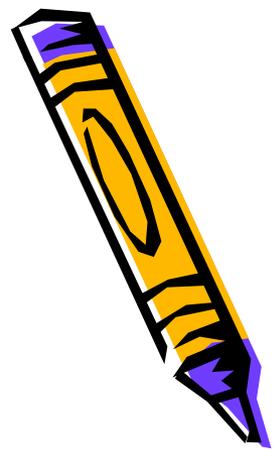

$$15 - 9 + 7 = 13$$

$$20 + 3 - 6 = 17$$

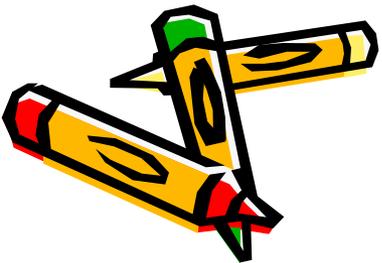

$$54 - 5 - 4 = 45$$

$$42 - 6 - 6 = 30$$

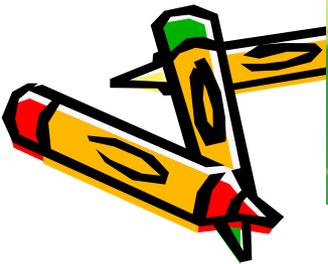

$$37 + 8 - 5 = 40$$

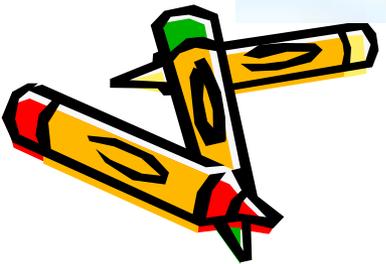

$$28 + 7 - 6 = 29$$

Ребята,
давайте жить
дружно!

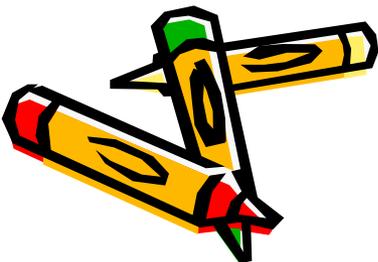

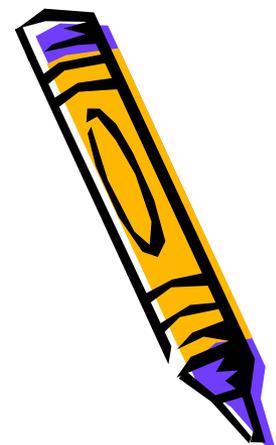

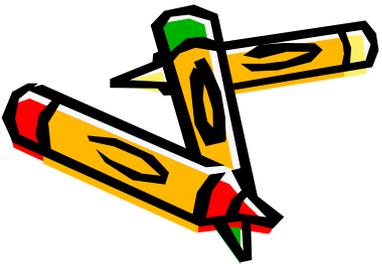

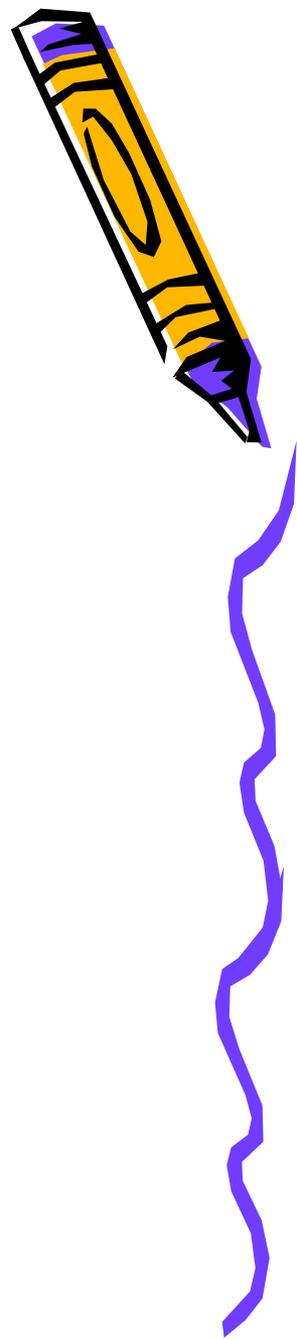

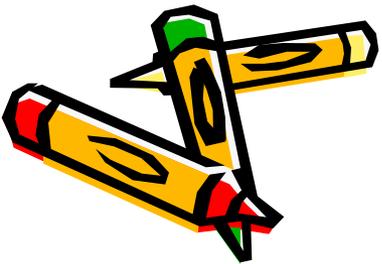

Дюйм - это мера длины.

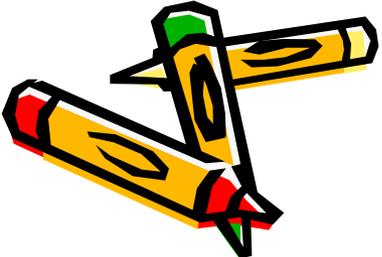

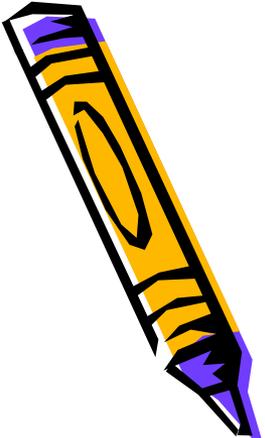

Она равна ширине большого
пальца взрослого мужчины.

Приблизительно 2 см 5 мм

Спасибо за урок!
