Назови все геометрические фигуры

Жили-были три подружки

В разных домиках своих.

Три весёлых хохотушки –

Точками все звали их.

Между этими домами
Реки длинные текли.
Точки очень не хотели
Ножки промочить свои.

И тогда они решили
Между домиками взять,
~~Сделать мостики большие,~~
Чтобы в гости прибегать.
Мост с мостом соединился,
Треугольник получился.
