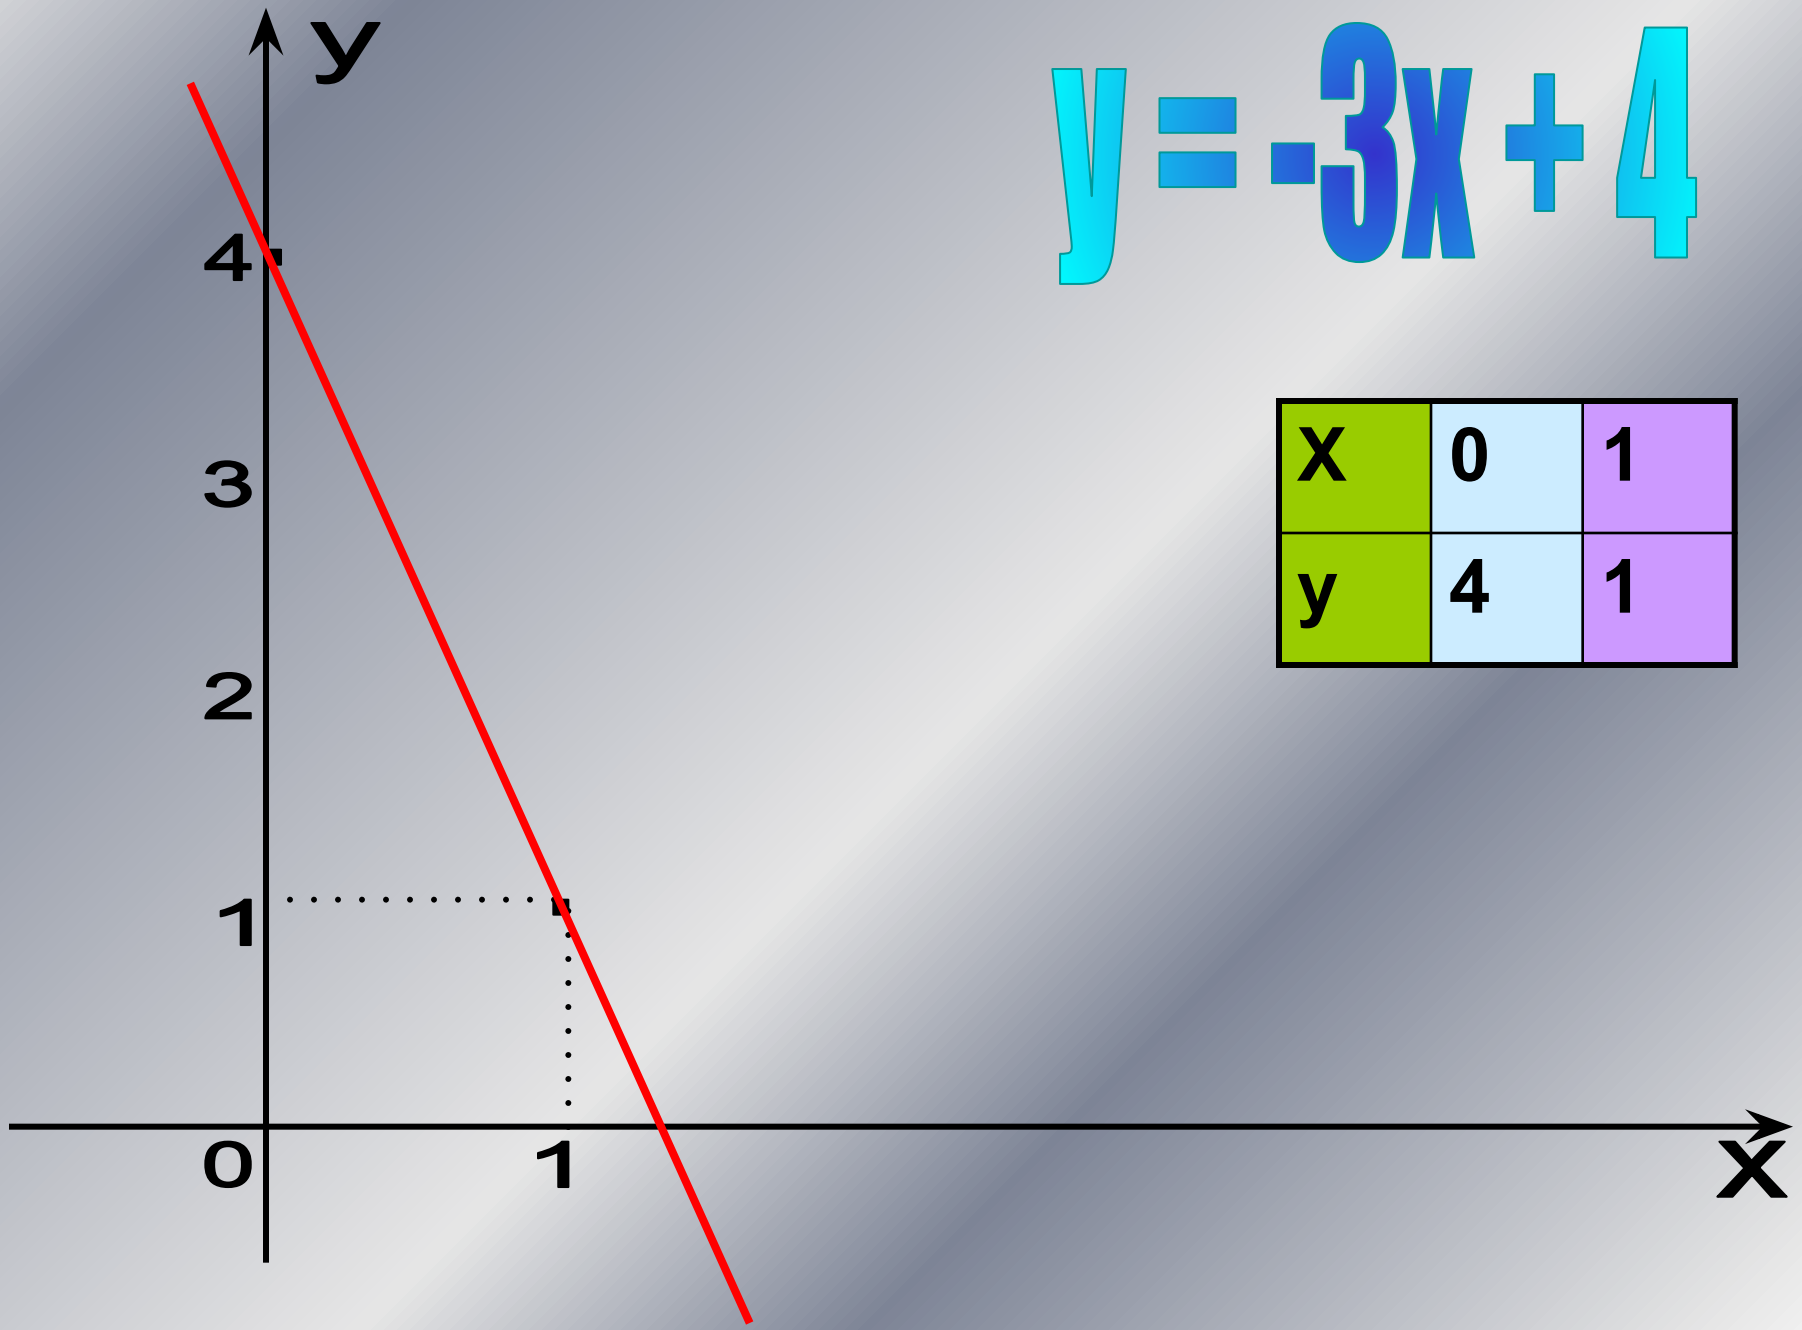
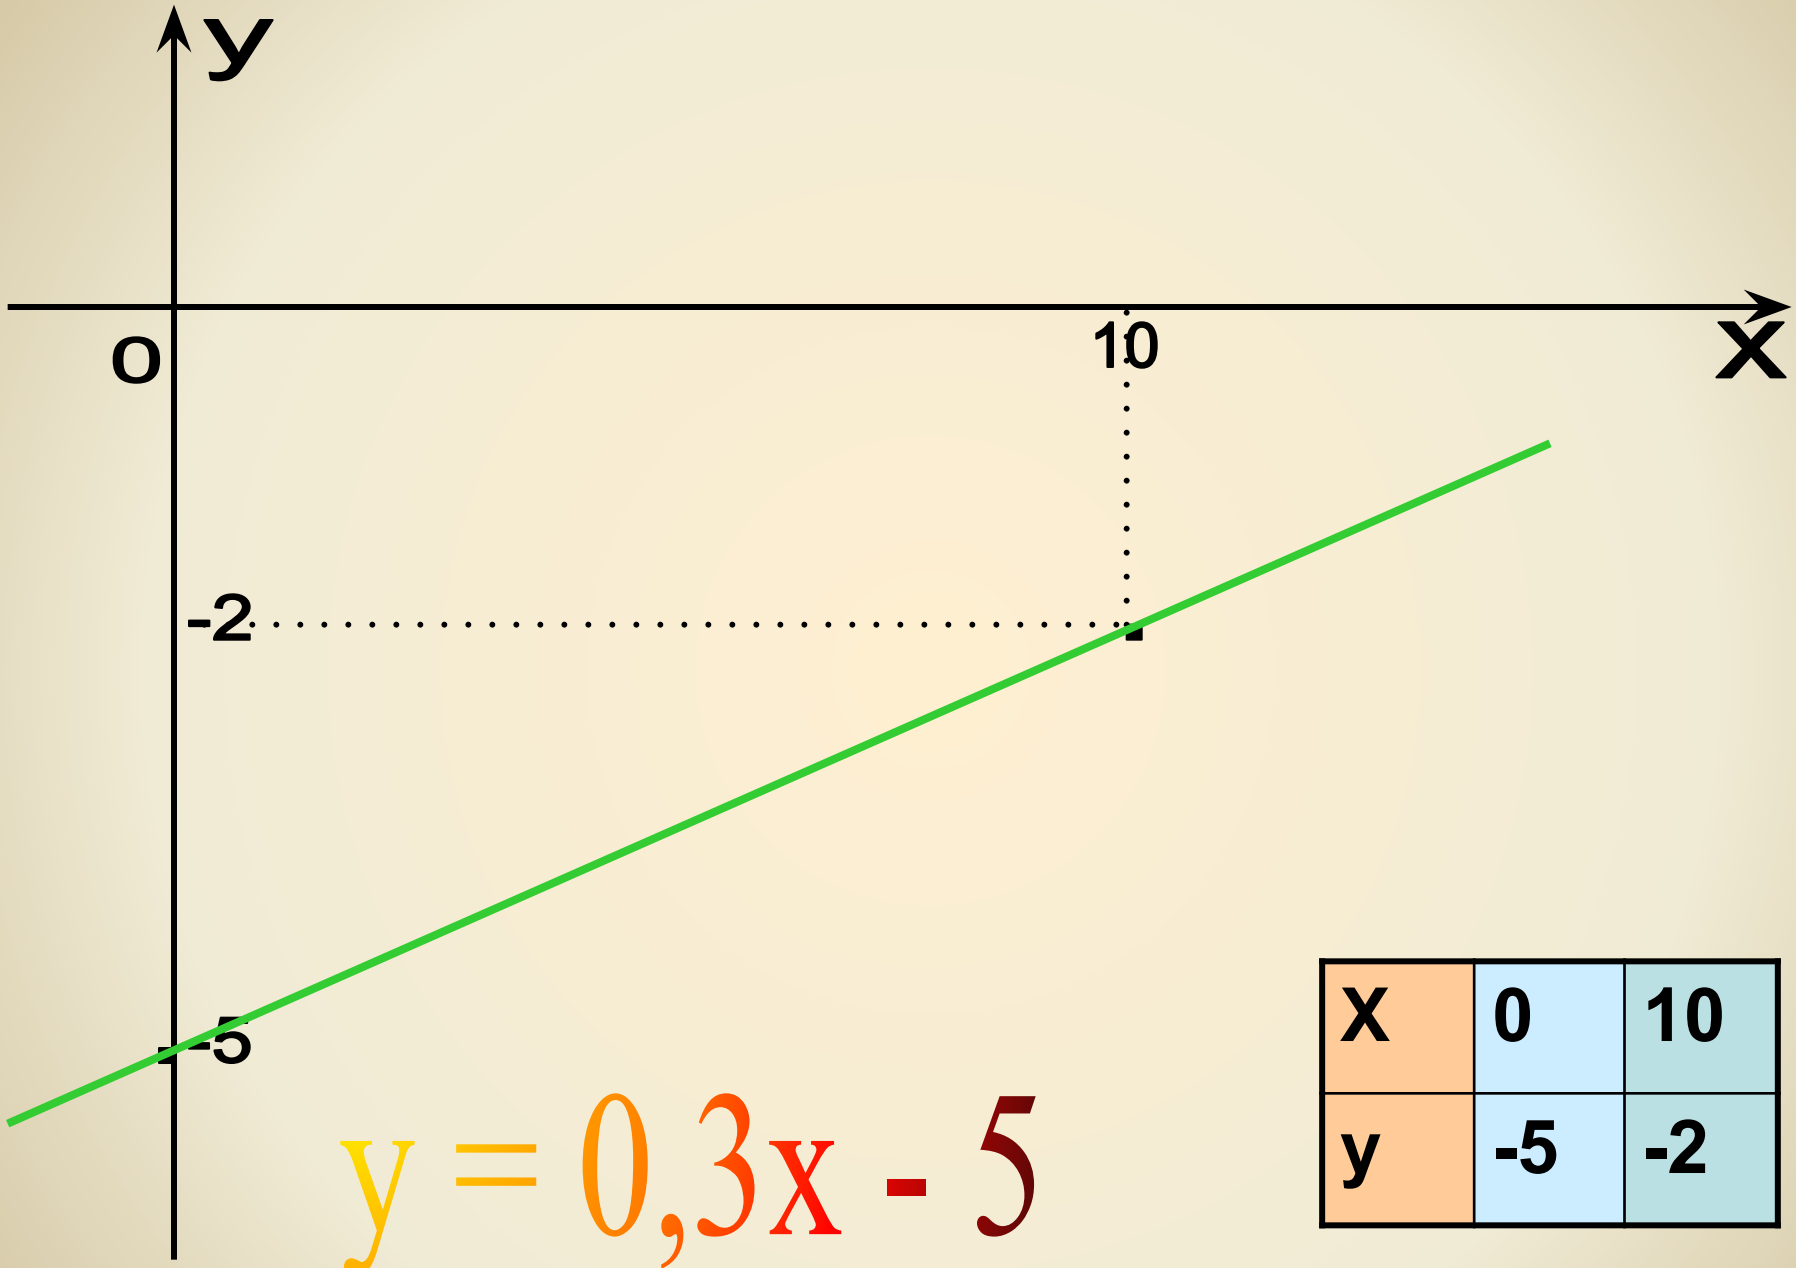
Примеры



$$y = -3x + 4$$

x	0	1
y	4	1



$$y = 0{,}3x - 5$$

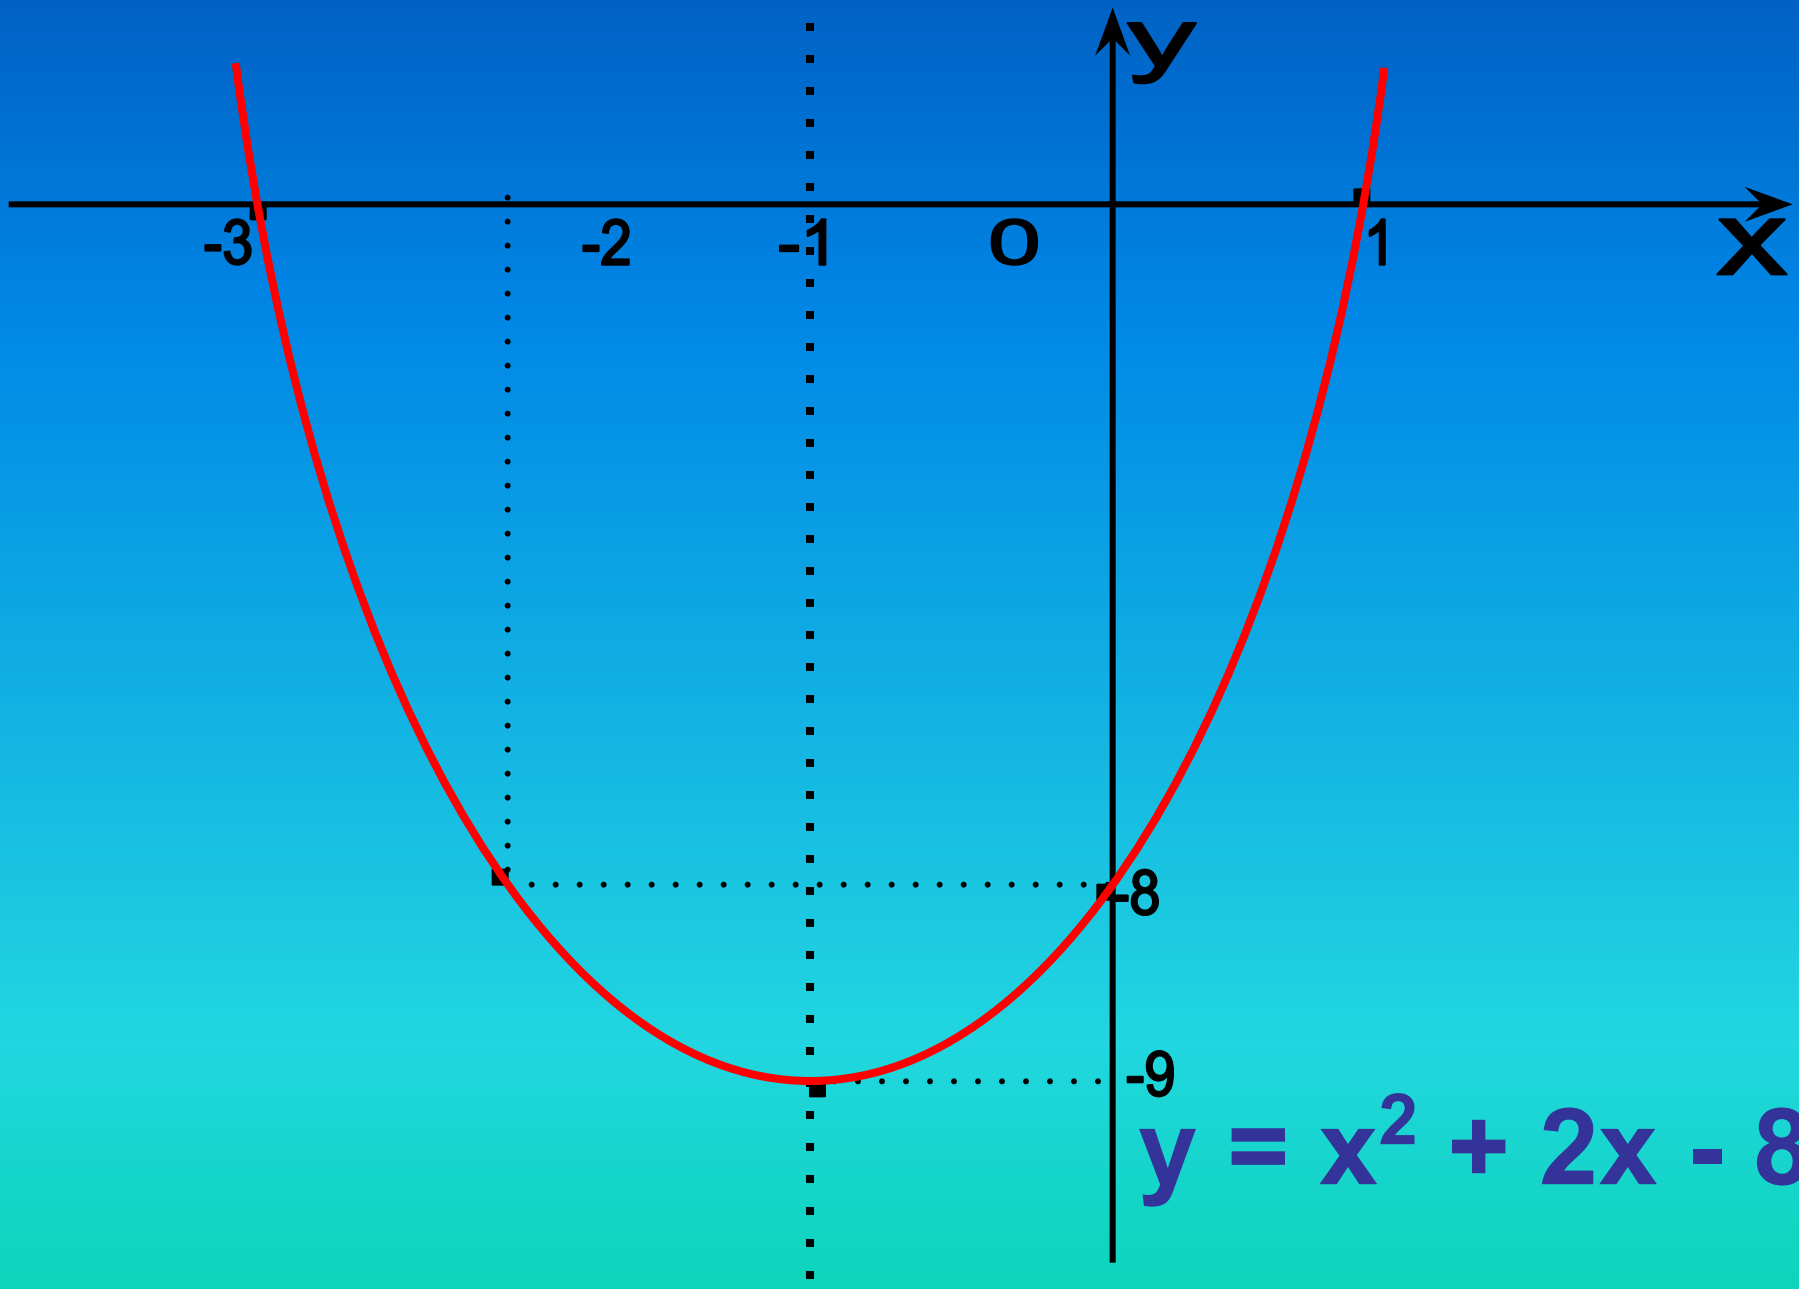
x	0	10
y	-5	-2

Построить график функции $y = x^2 + 2x – 8$.

1. Графиком функции является парабола, ветви которой направлены вверх.
2. $x_в = -b/2a = -1$; $y_в = -9$.
3. Нули функции: $y = 0$

   $x^2 + 2x – 8 = 0$, $D = 36$, $x_1 = -4$, $x_2 = 2$
4. Пересечение с осью OY: $x = 0$, $y = -8$

   $x = -2$, $y = -8$
5. Строим график.



$y = x^2 + 2x - 8$

Построить график функции $y = -x^2 + 8x - 7$.

1. Графиком функции является парабола, ветви которой направлены вниз.
2. $x_в = -b/2a = 4$; $y_в = 9$
3. Нули функции: $y = 0$

   $-x^2 + 8x - 7 = 0$, $D = 36$, $x_1 = 7$, $x_2 = 1$
4. Пересечение с осью OY: $x = 0$, $y = -7$

   $x = 8$, $y = -7$
5. Строим график.
