

180 - 90 = 380 + 130 =

450 - 70 = 820 - 740 =

250 + 570 = 90 + 360 =

80 + 100 = 510 - 260 =

The diagram shows four arithmetic problems on the left and four on the right. A vertical line is drawn between the two columns of problems. Arrows indicate connections between the problems: an arrow from the top-left problem to the top-right problem, an arrow from the top-left problem to the second-right problem, an arrow from the second-left problem to the top-right problem, an arrow from the second-left problem to the second-right problem, an arrow from the third-left problem to the second-right problem, an arrow from the third-left problem to the third-right problem, an arrow from the bottom-left problem to the second-right problem, and an arrow from the bottom-left problem to the bottom-right problem.

Расположите числовую последовательность
в порядке убывания:

523, 123, 423, 623, 223, 723

Увеличьте каждое из
однозначных натуральных
чисел в 100 раз.

$$3 \bullet 100 = 100 \bullet 3 = 300$$

$$8 \bullet 100 = 100 \bullet 8 = 800$$

$$5 \bullet 100 = 100 \bullet 5 = 500$$

$$9 \bullet 100 = 100 \bullet 9 = 900$$

$$4 \bullet 100 = 100 \bullet 4 = 400$$

$$7 \bullet 100 = 100 \bullet 7 = 700$$

$$23 \bullet 100 = 100 \bullet 23 = 2300$$
