

The image shows a top-down view of numerous discarded cigarette butts and ash scattered across a dark, textured surface. The butts are in various stages of being smoked, with some showing the white filter and others just the yellowish-brown end. The ash is a fine, brownish powder, and there are also some larger clumps of tobacco leaves. The lighting is dramatic, highlighting the textures of the paper, ash, and tobacco.

НИКОТИНИЗМ

A close-up photograph of a hand holding a lit cigarette. The cigarette is held between the thumb and index finger. A small amount of ash is falling from the tip of the cigarette into a white, shallow tray or container. The background is dark, and there are several other cigarettes and cigarette butts scattered around, some with ash. The overall scene suggests a focus on the act of smoking and the resulting ash.

Никотинизм — хроническое отравление никотином (у злобных курильщиков табака): раздражительность, снижение работоспособности, кашель с мокротой и др.
