 You must be careful always to burn the same oil,
 which may vary in size; if these precautions are not attended
 to, the dial never can be accurate.

*Patent Potatoe Composition, as he had learned
 of Yeast.*—To make a gallon of this composition,
 boil eight pounds of potatoes in the water, until
 them smooth, and mix with them, while they
 are warm, of flour of rye or any other grain, and a
 pint of yeast. For use, mix with it a quart of
 water, and a pint of oil, and it will be found
 to be a most excellent composition for burning
 in lamps.

Марш Черномора

До встречи!
