The author of numerous horrors, supernatural and fantastic bestsellers was born in September, 1947, in Portland, USA. Stephen King is considered to be one of the most readable writers in a whole world. When he was 7, Stephen started to write own stories inspired with science fiction and monster movies.

He graduated from college with a Bachelor of Arts degree in English and got a position of English teacher at a high school in Maine. Besides, he also wrote short stories for some magazines. However, the works were not popular and Stephen did not receive much money from the sale of them. The first novel which had a great success was *Carrie* (1974) – this book helped him come to the top of writers of horror stories.

Stephen King's novels are popular because of its simple language, detailed description of characters, attention to modern issues and ordinary situations in which evil occurs. He takes ideas from his own experience and locations' description were taken from places where he lived or just visited – all these things help to create the feeling that such ordinary people as you or your neighbours can be faced with monsters and frightening events.

A plenty of the author's books and stories have been made into movies: *Carrie*, *Salem's Lot*, *The Shining*, *Christine*, *The Green Mile*, etc.

- One of my favorite works is Charles Dickens 'Novel the adventures of Oliver Twist. I met Oliver, a very ordinary boy, experienced with him all his hardships and tribulations, was happy and sad, got together with him in different scrapes... I really want to know about it as many girls and boys.

- **"The adventures of Oliver Twist" is the first work in the UK, the main character of which was a child. Oliver Twist made Dickens a real star.**

**The novel was published in 1837 in the pages of George Cruickshank's literary magazine Bentley's Miscellany and appeared in parts until 1839. At the same time the work was printed as a separate book.**
