

Environmental Problems

**Environmental problems have become one of the most urgent problems of modern society. More and more people suffer from air and water pollution.**

**Nature also suffers from waste and nuclear pollution. The reasons for such environmental problems are numerous.**

**Among them the increasing number of cars in the streets, factory waste, millions of cut down trees, destroyed habitats of animals, contaminated rivers and seas**

**Fortunately, there are many ways to solve these problems. if we start recycling paper and cardboard, we can save lots of trees. If they forbid logging companies to destroy the forests, or stop factories from polluting water, we will protect our nature.**

**The most important thing is, of course, to start acting immediately, otherwise we might have to face many global disasters.**
