Устанавливаем 2 пластины

Ищем планку 8

по инструкции

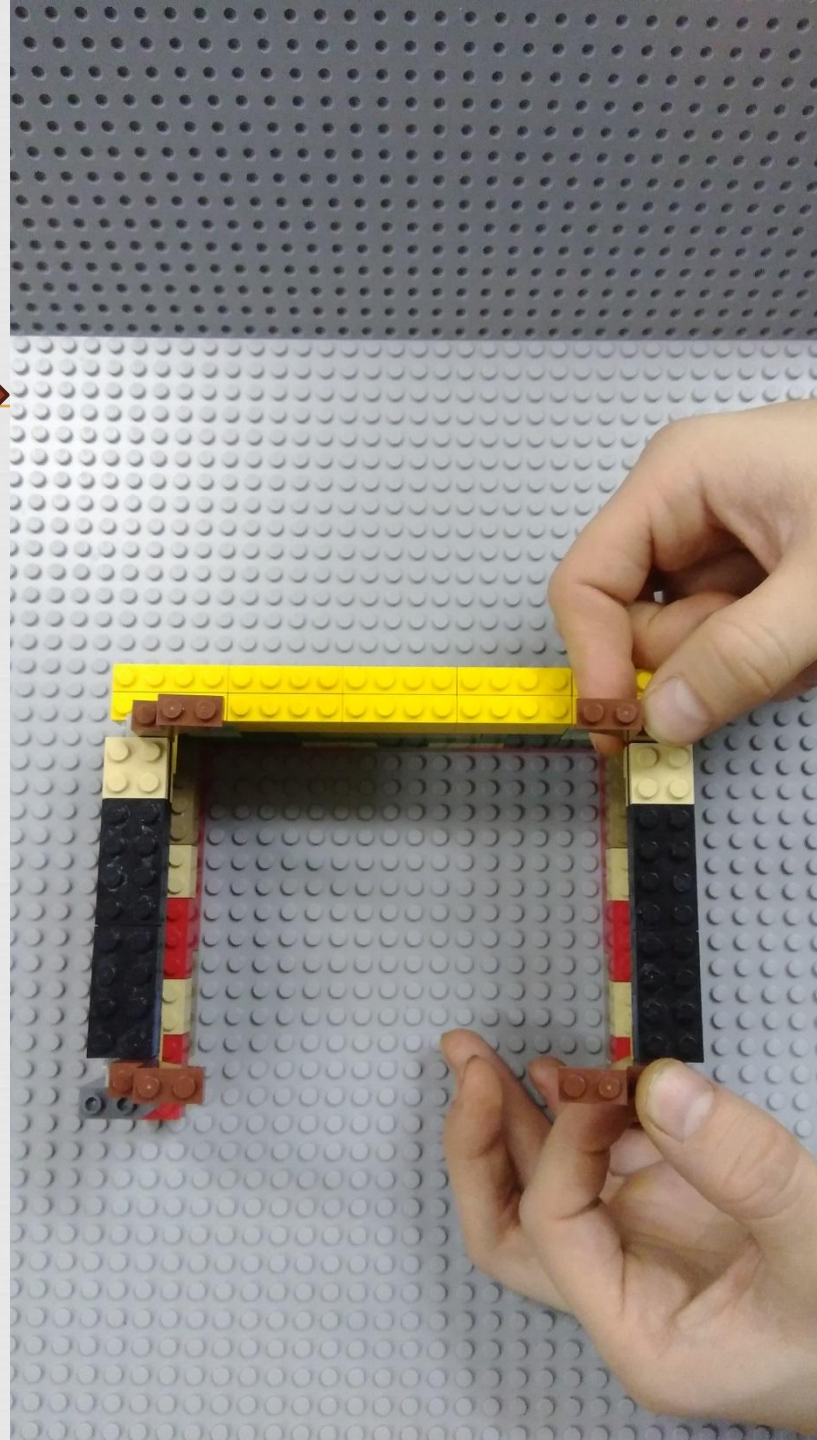

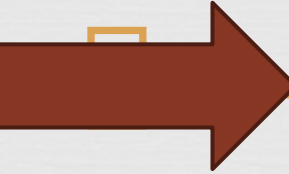

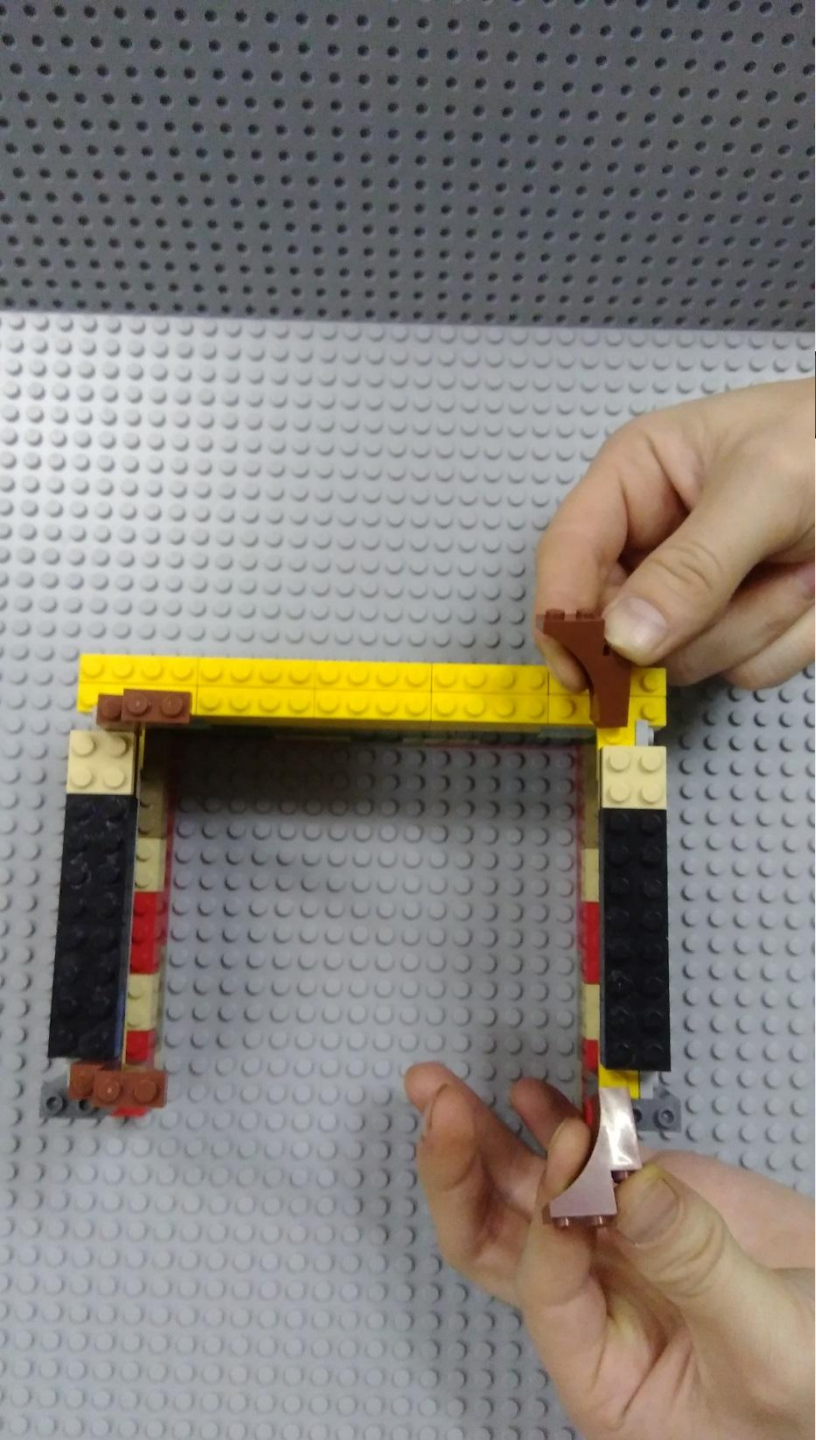

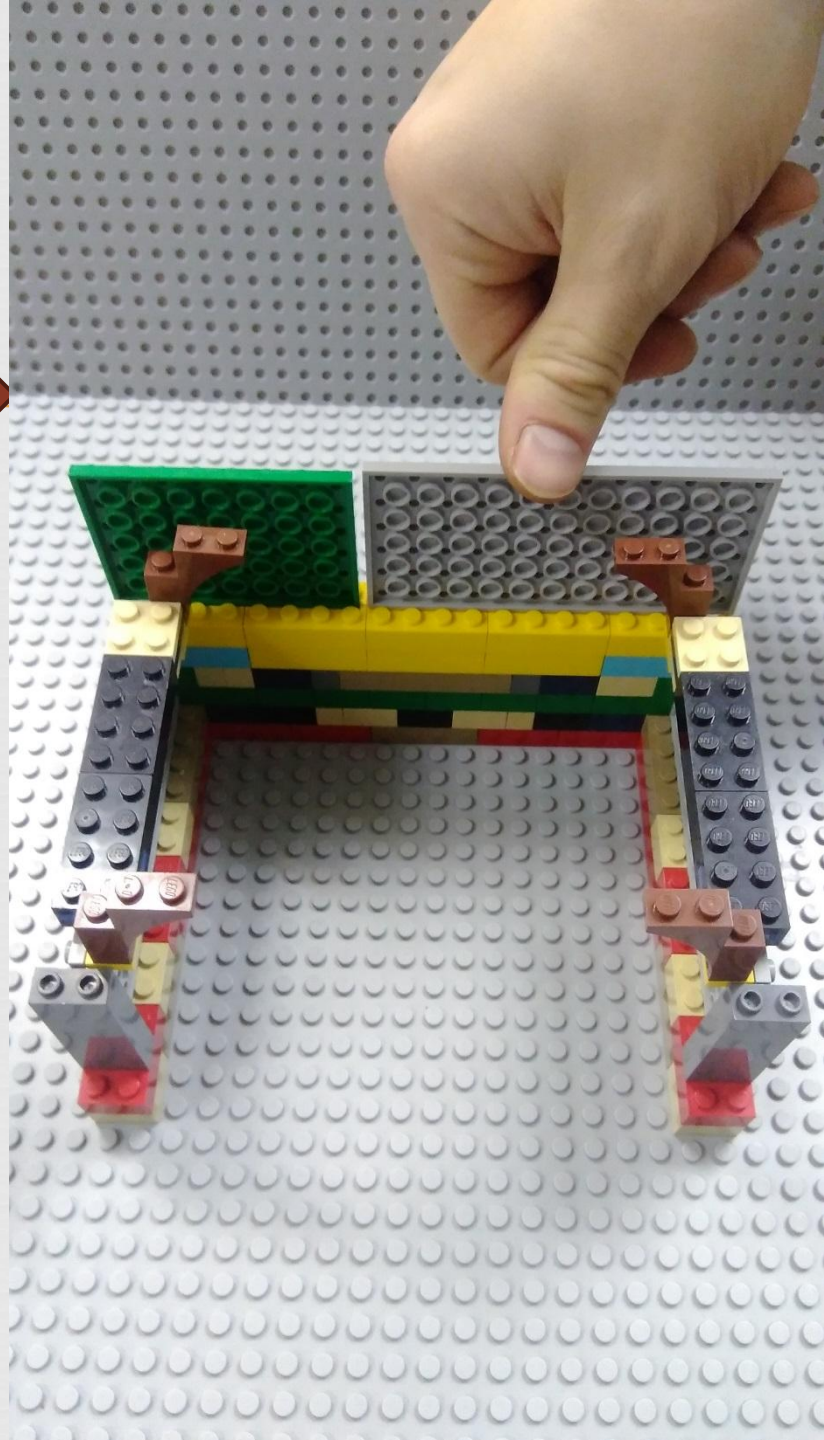

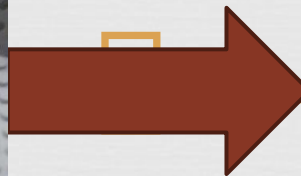

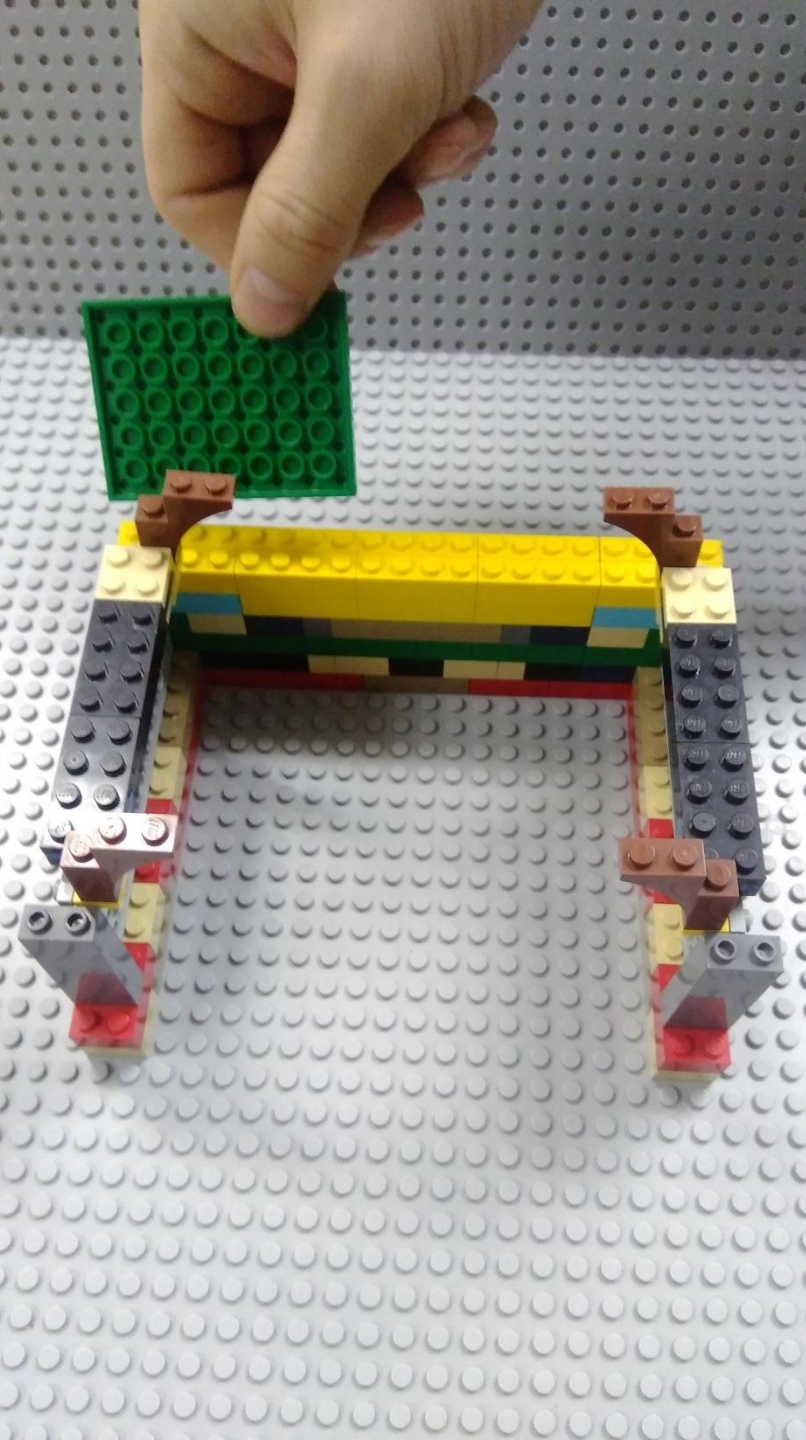

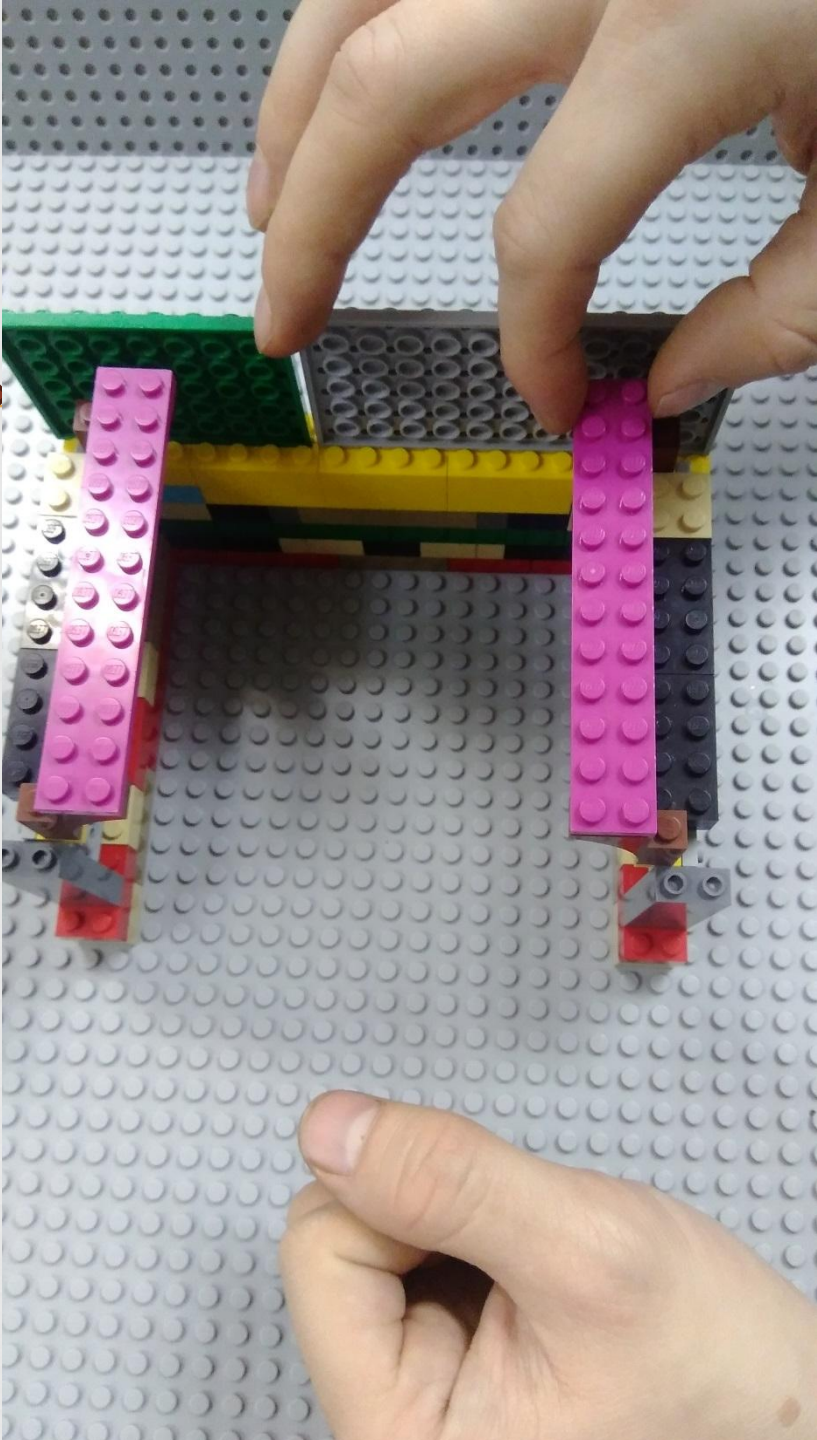

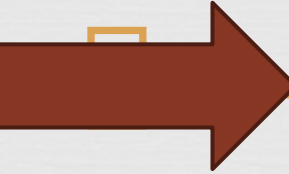

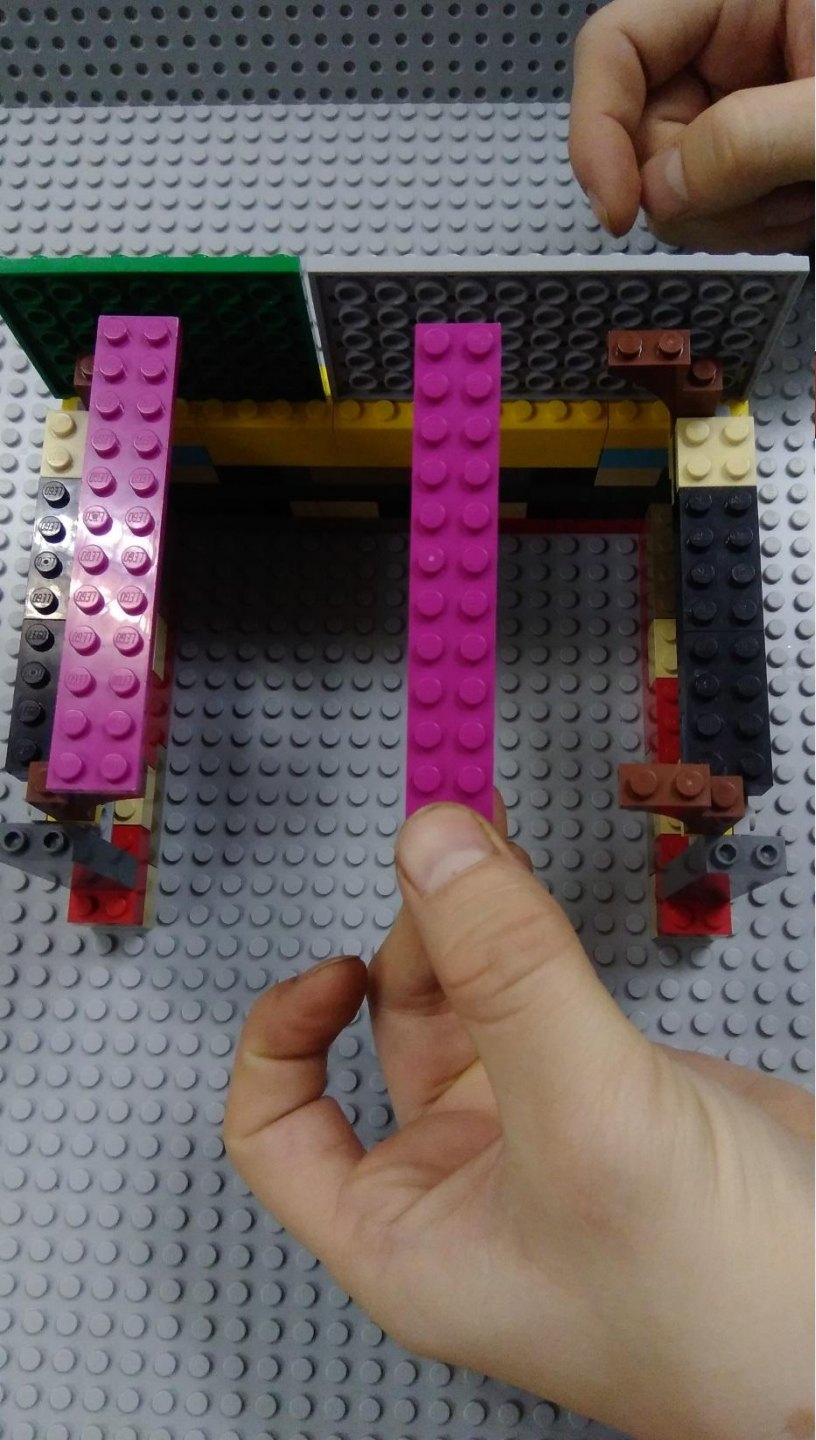

Таких планок

Прикладываем ребром, как показано на слайде, пластину 4 на 8, не прижимая и не фиксируя между точек!

По количеству точек на полублоке
МОЖНО ПОНЯТЬ куда его ставить

В данном месте сборки, планки нужно ставить не напротив друг другу!

По количеству точек можно понять где у Вас
ошибки, если они есть!

Соединяем две части, ставя одну на другую, как показано на изображении

Спасибо,

Вы молодцы!
