

Взрыв на ЧАЭС

Презентацию подготовили: Запрещенный текст.
2010 г.

A large, iconic mushroom cloud from the Chernobyl nuclear power plant explosion. The cloud is massive, with a thick, billowing white and yellowish top that spreads out like a giant umbrella. Below this, a narrower column of white and yellow smoke rises, leading to a smaller, more concentrated cloud at the base of the stem. The background is a clear blue sky with some light clouds near the horizon. The foreground shows a dark, flat landscape, likely the site of the power plant.

26 апреля 1986 года произошёл
взрыв на 4-ом энергоблоке
Чернобыльской АЭС.

Из-за неосторожности и несоблюдения правил безопасности рабочих и проектировщиков ЧАЭС пострадали многие дети.

Но к сожалению урок не
усвоен и всё еще
существует большая
вероятность
возникновения новых
«Чернобылей»

ПРИ ПЯТЬ РОДНАЯ,
КОНЫИ НАШ ГОРОД...

A photograph of a worker in a white protective suit and cap, sitting at a control console in a nuclear reactor control room. The worker is looking at a control panel with numerous buttons, switches, and dials. The background shows a large room with multiple control panels and monitors. The text is overlaid in red on the image.

Сейчас в пользование
введён первый блок
Чернобыльской АЭС

A black and white photograph capturing a scene of industrial devastation. In the foreground, a firefighter stands on a set of railway tracks, directing a powerful stream of water from a hose towards a large, damaged structure. To the right, a pile of rubble, including concrete blocks and twisted metal, is visible. In the background, another firefighter is seen near a large, dark, cylindrical object, possibly a piece of machinery or a damaged component. The overall atmosphere is one of active emergency response in a hazardous environment.

Пожарники тушившие
ЧАЭС обрекали себя на
верную смерть.

Сейчас в Чернобыле и Припяти
проводятся экскурсии.
