A vibrant illustration of a solar system. In the bottom left corner, a large, bright sun with orange and yellow flames is partially visible. The background is a deep blue space filled with numerous white and blue stars of varying sizes. Several planets are shown in orbit around the sun, following curved paths. From left to right, the planets are: a small white planet, a brown planet, the Earth with its blue oceans and green continents, a small yellowish planet, the large brown and white striped planet Jupiter, the yellow planet Saturn with its prominent rings, and a bright cyan planet. A blue comet with a long tail is streaking across the upper left, and another is in the lower right.
