

**MICRO**

# MICRO

A scanning electron micrograph (SEM) showing a cluster of biological cells with a highly textured, porous surface. The cells are interconnected, forming a network of irregular shapes. The lighting highlights the intricate details of the cell walls and the spaces between them. The overall appearance is that of a complex, three-dimensional biological structure.

The background of the slide is a solid blue color. On the left side, there is a vertical strip containing a microscopic image of white, fluffy, spherical structures, likely bacteria or fungi. Overlaid on this strip is the word "MICROBIOLOGY" in a large, semi-transparent, blue, sans-serif font, oriented vertically.
