- 11 млн исследователей
- Top 25 service
- Alerts и RSS feeds
- Мобильные приложения

The screenshot shows the ScienceDirect homepage with the SciVerse logo and links to ScienceDirect, Scopus, and Applications. The main navigation bar includes Home, Publications, Search, My settings, and My alerts. Below this are search fields for Articles (with radio buttons for All fields and Author), Images, and a dropdown for Journal/Book title. There are also fields for Volume, Issue, and Page, followed by a Search button.

The main content area displays the journal "International Journal of Gastronomy and Food Science". It features a thumbnail image of a dish, the journal's name, and copyright information. Below the journal name are links for "New Article Feed", "Alert me about new articles", and "Add to Favorites".

Below the journal information, there is a link for "Volume 1, Issue 1, Pages 1-80 (January 2012)". This section includes a legend for icons: a green square for Full-text available and a grey square for Abstract only. It lists "Volume 1 (2012)", "Volume 1, Issue 1 pp. 1-80 (January 2012)", and "Foreword from the editors" by Begona Perez Villarreal. It also includes links for "Show preview", "PDF (228 K)", "Related articles", and "Related reference work articles".

Further down, it shows "Contributors" (Pages 3-4) and "Gastronomy in perspective" (Pages 5-14) by Bénédicte Beaugé. Each section has a "Show preview" link and PDF download links.

How to publish in an Elsevier journal

Every year, we accept and publish more than 250,000 journal articles. Publishing in an Elsevier journal starts with finding the right journal for your paper. If you already know which journal, you can enter the title directly in the search box below. Alternatively, click on the 'Start matching' button to find a suitable journal based on the abstract of your article.

[Match your abstract to a journal](#) [Search for a journal by name](#)

[Start matching](#) or [Search for a Journal](#)

The Elsevier publishing process step by step

- 1. Find the right journal**

The first step is finding the right journal for your paper. Among the thousands of journals and books published by Elsevier are some of the world's most prominent and respected medical, scientific and technological publications. These include The Lancet, Cell

ELSEVIER

Цели

- Повышение публикационной активности, цитируемости публикаций и репутации в академической среде => рост в международных рейтингах
- Наращивание издательской экспертизы
- Привлечение иностранных исследователей
- Подготовка журналов к индексированию в Scopus и других базах цитирования, к получению/повышению Импакт Фактора

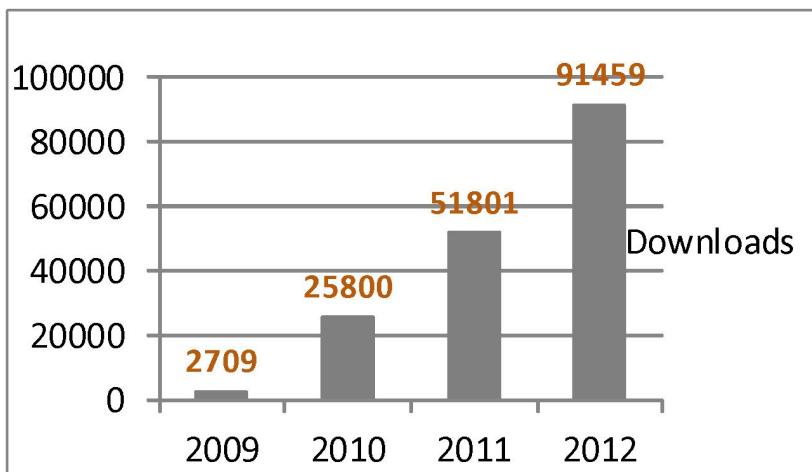

Программа

- Журналы размещаются на платформе ScienceDirect
- Авторское право принадлежит университету, организации
- Elsevier – аутсорсинг издательского процесса
- Редакционная политика – под контролем университета, организации
- Журналы публикуются на английском языке

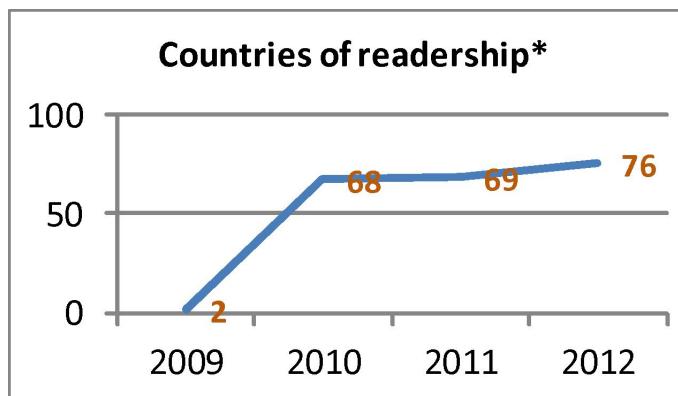

Пример А

Региональный журнал по фармацевтическому анализу. Р&Н с середины 2009.

Рост скачивания на Science Direct

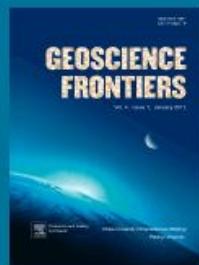

Международная аудитория

*Топ 3 США, Саудовская Аравия, Китай

Читатели: 8512 организаций включая GlaxoSmithKline, MIT и Yale University

- 8 стран представлены в редакционной коллегии
- Подача публикационных заявок из 20 стран
- Увеличение публикационных заявок втрое
- Первый ИФ и индексация в Scopus в 2010
- ИФ увеличился в 5 раз
- Процент отклоненных статей вырос с 3% в 2009 до 90 % в 2012

Research paper

Speculations on the mechanisms for the formation and breakup of supercontinents

J. Brendan Murphy^a , R. Damian Nance^b^a Department of Earth Sciences, St. Francis Xavier University, Antigonish, Nova Scotia B2G 2W5, Canada^b Department of Geological Sciences, Ohio University, Athens, OH 45701, USA<http://dx.doi.org/10.1016/j.gsf.2012.07.005>, How to Cite or Link Using DOI

Abstract

The supercontinent cycle has had a profound effect on the Earth's evolution since the Late Archean but our understanding of the forces responsible for its operation remains elusive. Supercontinents appear to form by two end-member processes: extroversion, in which the oceanic lithosphere surrounding the supercontinent (exterior ocean) is preferentially subducted (e.g. Pannotia), and introversion in which the oceanic lithosphere formed between dispersing fragments of the previous supercontinent (interior ocean) is preferentially subducted (e.g. Pangea). Extroversion can be explained by "top-down" geodynamics, in which a supercontinent breaks up over a geoid high and amalgamates above a geoid low. Introversion, on the other hand, requires that the combined forces of slab-pull and ridge push (which operate in concert after supercontinent break-up) must be overcome in order to enable the previously dispersing continents to turn inward. Introversion may begin when subduction zones are initiated along boundaries between the interior and exterior oceans and become trapped within the interior ocean. We speculate that the reversal in continental motion required for introversion may be induced by slab avalanche events that trigger the rise of superplumes from the core-mantle boundary.

Open access publishing

Access to quality research is vital to the scientific community and beyond. We support sustainable access and work hard to provide a range of open access options alongside our access initiatives to ensure everyone can read, use and trust the latest research.

We are committed to working in partnership with the research community, librarians, funders and other stakeholders. Our Elsevier team are continually on the road meeting the community, participating in discussions and establishing partnerships which will help support increase access to research. Read more about our institutional and funding body agreements.

Below is an overview of our open access publishing options:

Share This:

Open Access Journals

Discover our range of open access journals.

Open Access Articles

Publish open access in over 1500 of our high quality hybrid journals.

Open Archive

Free access to archived research in a number of Elsevier and Cell Press Journals.

Green Open Access

Elsevier's approach to self archiving.

Embase®

Find quick, accurate answers to your biomedical questions.

Embase is the most comprehensive biomedical database available online, providing extensive coverage of peer-reviewed biomedical literature, selected and indexed specifically for the biomedical field.

Need to know:

- Over 24 million records from more than 7,500 current, peer reviewed journals as well as 2,000+ biomedical titles not currently offered by MEDLINE
- The most relevant results indexed by biomedical experts using the unique life science thesaurus, Emtree, which includes chemical names, trade names, and laboratory/research codes mapped to generic names for more than 27,000

PharmaPendium™

Comprehensive drug data at a researcher's fingertips.

PharmaPendium is a unique online resource that puts drug safety data of US-approved drugs at a researcher's fingertips. PharmaPendium is the only online resource able to search all FDA/CDER/FOI archived FDA drug approval review and correspondence documentation since 1938, as well as an EMA/EPAR approval document database.

Need to know:

- FDA Approval Packages - allowing you to search through more than 1,465,000 pages of information and experimental data including reviews, labels and other data.
- European Medicines Agency's (EMA) European Public Assessment Reports (EPARs) - 76,000+ pages of searchable EPAR documents on EMA-approved drugs, including over 50 drugs/mixture not approved by the FDA.
- Adverse Event Reporting System (AERS).
- Meyler's Side Effects of Drugs, 15th edition with over 40,000 references.
- Extracted metabolite data from literature
- Extracted pre-clinical and clinical toxicity data
- Extracted toxicity data from literature, from a pool of over 3,000 journals and other global sources. ■

Базы данных для инженеров и геологов

Engineering Village®

Find relevant, and trustworthy engineering information.

Engineering Village is a powerful search platform where researchers can search multiple databases focused on engineering literature from a range of reliable sources, including scholarly journals, trade publications, patents, government reports, reference books, and conference proceedings.

Engineering Village provides access to today's most important engineering content through one single interface:

- Compendex™
- Engineering Index Backfile
- Inspec
- Inspec Archive
- NTIS
- Referex
- Patents from USPTO and esp@cenet
- EI Patents
- EnCompassLITTM™
- EnCompassPAT™
- GEOBASE®

Why invest in Engineering Village?

- Engineers won't miss a thing with complete coverage of the authoritative sources
- Engineering thesaurus and tailored index ensures quick access to answers

Geofacets™

Designed for geoscientists working in the early stages of upstream exploration.

Geofacets is a searchable database of geo-referenced geological maps that enables users to assess a region or basin's geologic characteristics with efficiency and confidence. By streamlining the process of synthesizing content, Geofacets allows users to spend less time searching for maps and more time on analysis and interpretation.

Need to know:

- More than 125,000 geologic maps with over 75,000 geo-referenced and downloadable as GeoTIFFs for integration into GIS software
- Map metadata and information such as coordinates and scale, map datum and projections, and abstracts and bibliography of associated articles
- Map information overlays from leading industry providers such as IHS and Wood Mackenzie
- Intuitive search features designed for geoscientists including an interactive map interface, geo-based search facets (e.g., map type, map surface area, geological basin), and advanced keyword text search to find geological analogs
- Links to maps' associated full-text articles (read-only PDF or via ScienceDirect), which provide access to 40,000+ scientific journal articles from Elsevier's earth science journals. ■

Why invest in Geofacets?

- Retrieve relevant geological maps and background data 3 times faster
- Combine and overlay maps to create completely new

The screenshot shows a researcher profile page for Lisbeth Fajstrup. At the top, there is a logo for AALBORG UNIVERSITY and a search bar labeled "Search VBN". The main header says "VBN - RESEARCHER". Below the header, there is a navigation menu with tabs: Overview, Publications, Projects, Activities, Press clippings, Journals, and Publishers. The "Overview" tab is selected.

Lisbeth Fajstrup
Associate Professor
Department of Mathematical Sciences
Fredrik Bajers Vej 7, Building G, 2-117
9220, Aalborg Ø
Denmark

Взаимосвязи ученого

Основные группы пользователей Pure

Pure позволяет администраторам науки:

- Проводить мониторинг и управление всем жизненным циклом исследований, от получения грантов и практического осуществления, до получения наград и смежных проектов
- Устанавливать цели выполнения проектов с помощью настраиваемых показателей и отслеживать прогресс их выполнения
- Просматривать аналитику высокого уровня или перейти к детальным данным по отдельным исследователям или проектам
- Создавать и распространять отчеты по любым данным Pure в режиме реального времени
- Поддержка национальных систем оценки научных исследований (EuroCRIS, REF2014 и т.п.)

Pure позволяет ученым:

- Легко управлять своими авторскими профилями и резюме с помощью автоматического добавления публикаций, а также предоставлять их как дополнение к заявке на грант
- Повышать свою персональную видимость, автоматически публикуя свои достижения онлайн
- Создавать отчеты о своей деятельности для продвижения по службе и для заявок на доп. финансирование
- Автоматическое заполнение институционального репозитория данными из персонального профиля (например DSpace, ePrints, FEDORA, Equella и др.)
