

Buildings & Water

Cities

Buildings

- In a city, you can see lots of buildings. There are museums, schools, hospitals, universities, bridges, and Supermarkets.

Cambridge University

London Bridge

Mall of the Emirates Dubai

It has escalators and cafes

Tourists go to this mall and they take photos.

In cities, there are high buildings called skyscrapers and people use lifts to go from one floor to another

Sometimes you can go to the top and look at the city

The streets are for everyone. You can walk with your family or friends. You can look in store windows. You can watch people, cars, and buses.

Water

Many big cities are by an ocean.

They have a harbour for ships. Ships bring materials for new buildings and goods for people. Ships bring tourists, too.

Sydney's harbour

Many cities are on big rivers. In these cities You can find great bridges. There are bridges for people, cars, and trains.

Cairo on the Nile river

London on the Thames river

Some cities are in water and the streets are canals so people use small boats called gondola to move

Venice in Italy

Some cities are on islands surrounded by water

Malé (Maa-Lay) – the capital and largest city of the Republic of Maldives
