

ENERGY OF THE RUSSIAN FEDERATION

TYPES OF POWER PLANTS IN RUSSIA:

- thermal power plant
- hydro power plant
- nuclear power plant
- geothermal power plant
- wind power plant
- solar power plant
- tidal power plant
- biomass power plant

POPULAR POWER PLANTS OF THESE OPTIONS

PERCENTAGE OF ELECTRICITY GENERATION:

- thermal power plant.....(67%)
- hydro power plant.....(18%)
- nuclear power plant.....(13%)
- everything else.....(2%)

THE PERCENTAGE DISTRIBUTION OF TOTAL ENERGY:

- population and its needs.....(64%)
- Industry and construction.....(36%)

THE BASIC PROBLEMS OF THE ENERGY COMPLEX:

- growth in energy demand and energy;
- increasing the load on the environment.

SOLUTIONS TO PROBLEMS :)

- replacement of traditional primary energy resources for alternative and renewable sources of energy-efficient;
- development and introduction of new methods of producing energy...
