# Rolls-Royce Phantom \$320,000

May 4, 2004 was exactly one hundred years since the first meeting of Charles Rolls and Henry Royce, which culminated in the emergence of the legendary British brand Rolls-Royce. In honor of this event, Rolls-Royce decided to release a special limited edition luxury sedan Phantom. In technical terms, all the cars of the special series will not be anything different from the basic version and will have the same 12-cylinder engine. The main differences are hidden in the cabin of the sedan. Here there will be special signs with the names of the founders of Rolls-Royce and the date of their meeting, as well as a number of specific cars in this series. In addition, all cars will have slightly different front panels, with aluminum accents and mahogany, plus several additional items not available in conventional cars. A number of "ordinary" Rolls-Royce Phantom last year exceeded 2000. можно

# Infiniti Essence \$285.314

**Infiniti Essence - A new conceptual model, which opens the future of the brand Infiniti. Rear-wheel drive sports coupe with 600 hp became one of the most interesting novelties of the International Geneva Motor Show 2009**

**The idea was to create Essence is to make a fascinating and beautiful, aesthetically unique, but with all this, it is extremely functional car. The novelty had no predecessors, it was created "from scratch", focusing on representations of the potential owner of a typical Essence. можно**

# Lamborghini Murcielago \$279,900

Some avtoobozrevateli for some time been criticized recently for the creation of the Lamborghini that it is not as "otvyaznoy" which, for example, was the first Countach. Interestingly, many of these critics have not even seen through the eyes of its Murcielago - and in vain. When you look at this car, stun large enough to criticize the idea of it even came up. Yes, the design of Murcielago, maybe not as good as that of the first "selachians» Lambo, however, he clearly attracts and caresses the eye. In addition, it may not be confused with anything.

Rosso.

This is entirely a sports car, both external and internal geometry. Leather seats, steering wheel, pedals, gearbox - all fused with the body, hands and feet the driver, forming a single unit. As for the engine, there are also all out sports class: V12, 580 hp, allowing speeds of up to 205 mph and above 60 mph (100 km / h) Murcielago does in 3.8 seconds. But even at lower speeds, the torque is transmitted smoothly, so that the driver there is no need to untwist the engine on all 7500 rev. / Min, to feel the real pleasure of power.

Of course, Murcielago - the machine is not for the city. Her driving in dense city traffic of ordinary cars may have been a meal, given the extremely low landing and, therefore, limited review, not to mention the fact that the city will be hard to eat even a tenth of what can Murcielago. This car is like space, large and deserted highway.

# Aston Martin Vanquish \$255,000

100 miles in 10 seconds. You can, of course, say 60 miles in 4.5 seconds, but agree that it would not sound so impressive. Anyway, not many serial cars can boast of such acceleration. But what always surprises while driving these cars, so this is as easy to manage these "monsters", even mind-blowing speeds. Vanquish is a great twist, and feel the speed limit, which you can happily make these turns, you can, perhaps, only on the racetrack. Because other conditions, the machine simply does not enter. Another technical detail: for suburban trips in the car provided for the automatic transmission.

# Alfa-Romeo \$250.000

Alfa Romeo "(Alfa Romeo SpA), Italian industrial company specializing in the production of high-end sports cars and other vehicles. Headquartered in Milan. The company history began with the fact that in 1906 in the town near the PortelloMilan was founded Society Societa Italiana Automobili Darracq, intending to collect the French light car "Darracq". At the head of society stood Ugo Stella. Lightweight cars in Italy were not popular and Stella decided to reorganize the only plant of "Society" in the original production of Italian cars. For example, in 1910 there was a company ALFA (Anonima Lombarda Fabbrica di Automobili), ie, "LombardCompany for the production of automobiles.«
