WHAT IS FINGER PRINT

Fingerprints offer an infallible means of personal identification. That is the essential explanation for fingerprints having replaced other methods of establishing the identities of criminals reluctant to admit previous arrests

HISTORY OF FINGER PRINT

The English first began using fingerprints in July of 1858, when Sir William James Herschel, Chief

Magistrate of the Hooghly district in Jungian poor, India, first used

fingerprints on native contracts. On a whim, and without thought toward personal identification,

Herschel had Rajyadhar Konai, a local businessman, impress his hand print on a contract.

KONAI's HANDPRINT
from the back of the contract
Bengal, India, 1858
