A schematic diagram of a hydraulic press. It consists of a large, light blue rectangular container filled with fluid. At the bottom of the container is a dark blue horizontal bar. On the right side of the container, there is a vertical cylinder. Inside this cylinder, there is a smaller, dark grey rectangular piston. The piston is connected to a horizontal bar that extends to the left and then turns upwards to support a dark grey rectangular block, representing the object being pressed.

Гидравлический пресс — это гидравлическая машина, которая служит для прессования (сдавливания).
