

Happiness

What is happiness.

When we are happy we smile; we are
over

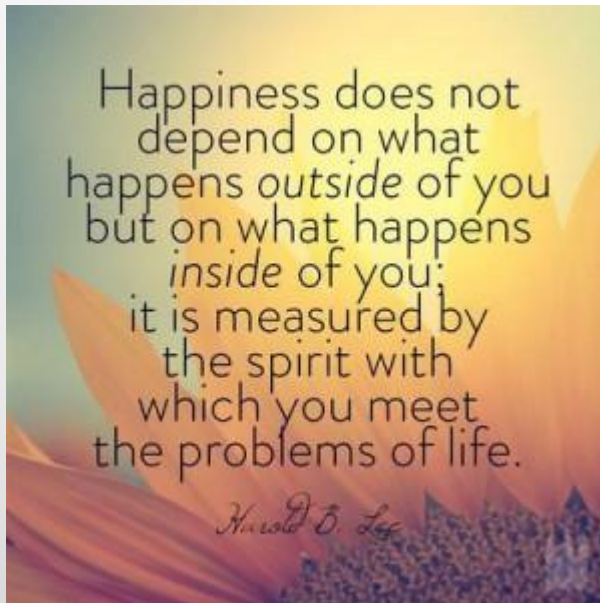

the moon and in high spirits,
When we are happy everything goes
right:

The future looks bright

We become frivolous

We are self-satisfied and light-hearted

We are overjoyed.

If you want to be happy – do it.

Happy people even look different:
They look joyful
They become sociable and playful
Their eyes are full of radiance

It is not difficult to be happy

It is not so hard to be happy. Just try to:
Remember the joyful moments
Try to look cheerful and happy despite the situation
Create happiness for others
Fill your life with a lot of beautiful and brilliant things.

Mathematics of Life

$$\begin{aligned} & \text{Life} \\ & + \text{Laughter} \\ & \times \text{Love} \\ & - \text{Hate} \\ \hline & = \text{Happiness} \end{aligned}$$

May your troubles be less
and your blessings be more
And nothing but happiness
come through your door
