- Referenses

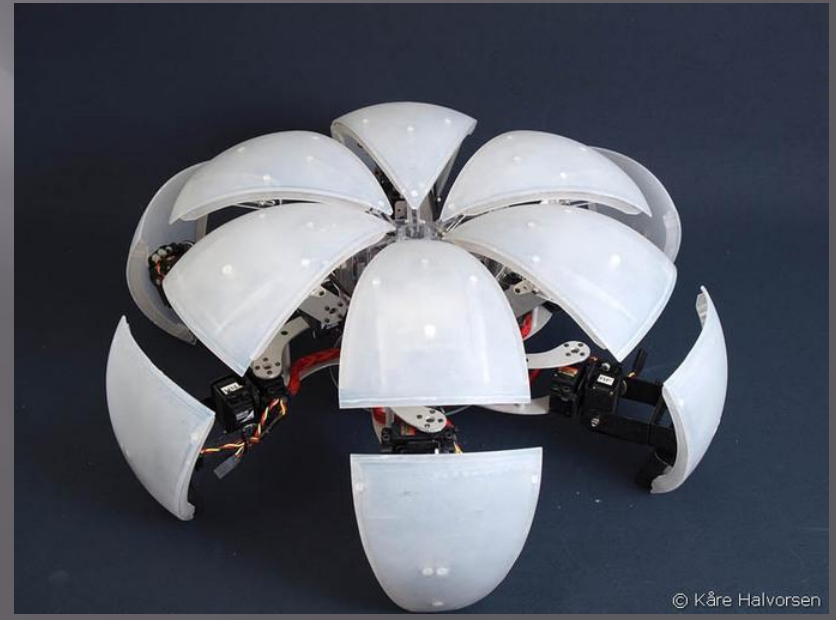

20th Century

- ❑ In 1913 - Charles McAuley constructs logical machine for solving logical problems.
- ❑ In 1946 - George Devol patents a universal device that uses magnetic recording device for controlling machines.
- ❑ In 1957 - On the Baikonur cosmodrome launch rocket 8K71PS
- ❑ In 1963 - Marvin Minsky publishes «Steps Toward Artificial Intelligence».
- ❑ In 1971 - Under the leadership of Ted Hoff at Intel created the first microprocessor.
- ❑ In 1992 - Involved in the establishment of radio-controlled vacuum cleaner Marc Thorpe comes to the idea of organizations fighting robots.

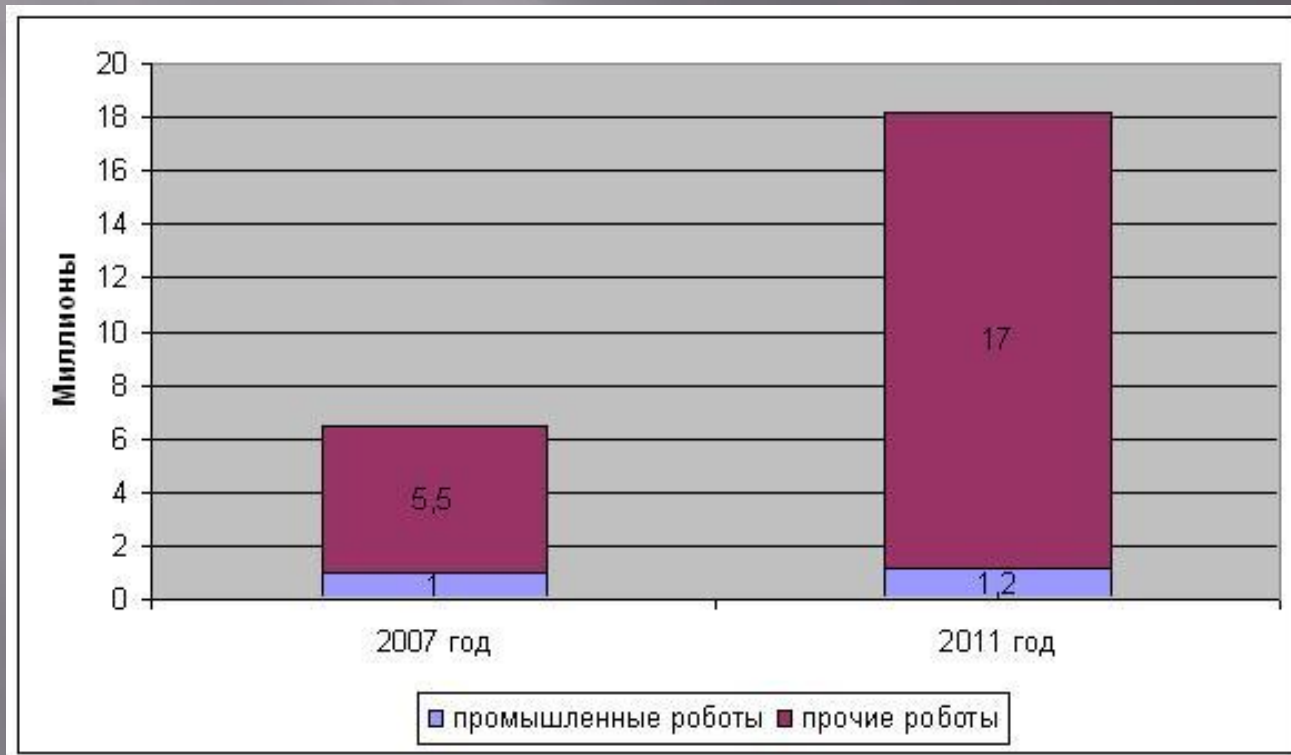

OUR DAYS

- ▣ Kevin Warwick at the University of Oregon creates first cyborg

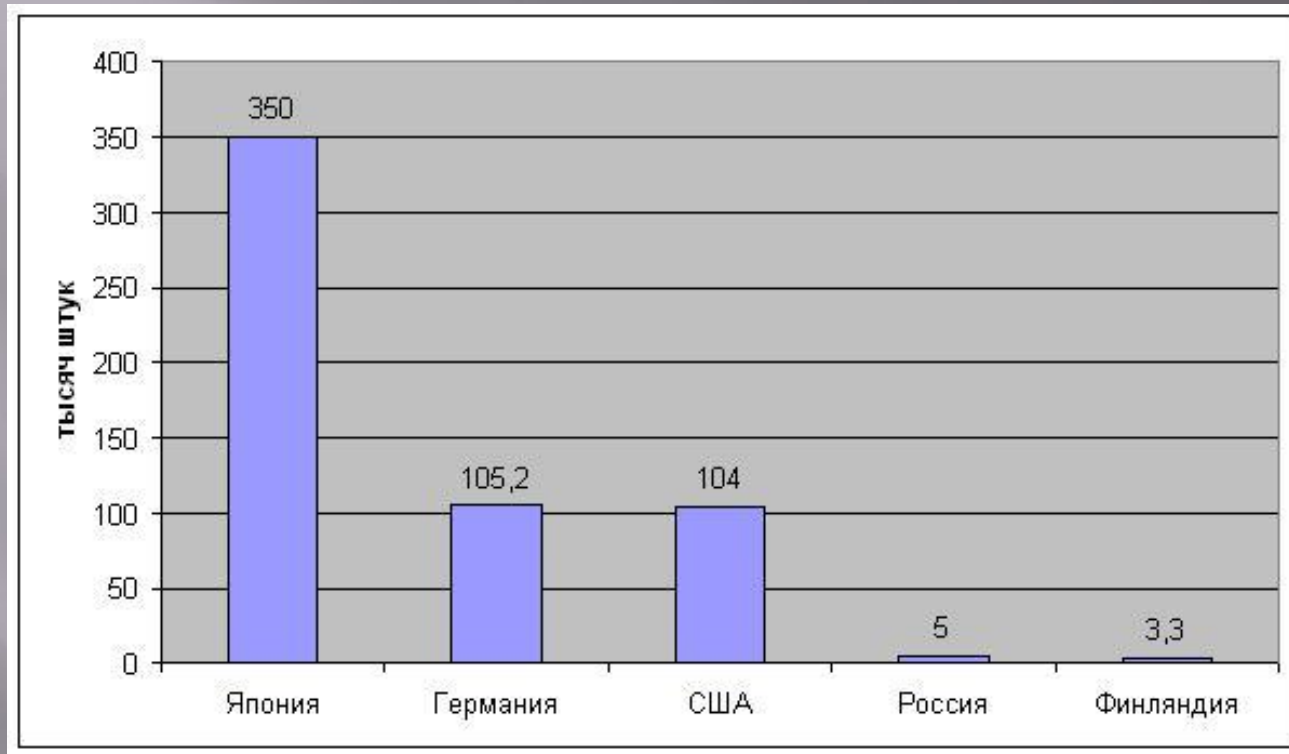

Facts

- Overall statistics and population trend in the world of robots

Conclusion

- As you can see the most ambitious growth robotics observed in Japan
