**Current :** We feed contents via 2 platforms, LINETODAY and LINE TIMELINE & LINE OA.
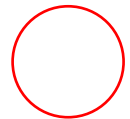

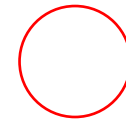

LINETODAY

LINE TIMELINE

LineToday

LineTimeline

**Requirement :** We don't have any problem about "LINETODAY" feed system. We just need another system similar to "LINETODAY" feed system for feeding content to "**LINE TIMELINE**" platform. Because we currently feed each content and generate the UTM manually via "**LINE Timeline**" platform But it's been taking too much time. So we request you to create the new content feeding system, then we can work on the new system instead of using LineTimeline platform. (Please see next page for our current working process.)

**LINETODAY Feeding System**

**LINE TIMELINE Feeding System**

**Our Requirement**

**A system to feed content to Line Timeline channel**

**Feeding system**

**How to upload content for LINE TIMELINE Platform**

"LINE TIMELINE" Platform backend

"LINE TIMELINE" Platform frontend

Shorten link that generated UTM already

# 1. Where do you take an URL for a content?

[   ] ⟵ Get URL

**Paste URL to this box to generate UTM**

URL that generated UTM already

[   ]
