

My favourite animals.

My favourite animals are parrots. They are blue, green, yellow and white. Parrots have got long tails, small beaks, wings and big claws.

Baby-parrots stay with their mothers for 1,5 months and then leave the nest.

In nature parrots live in crowds. But at home they are alone and can talk.

They eat vegetables, fruit and corn. Wild parrots live in Australia, but home parrots live in the cages.

I think parrots are beautiful and clever birds!
