

My future profession

Finished school is the beginning of the independent life for millions of school leavers. Many roads are open before them: technical schools, institutes and universities. Finished school is the beginning of the independent life for millions of school leavers.

Many roads are open before them: technical schools, institutes and universities. But it not easy thing to choose a profession. Some pupils follow the advice of their parents, others can't decide even after leaving school.

As for me I have made my choice long ago. I want to become a teacher of the Ukrainian language and literature. My choice of this occupation didn't come as sudden flash. During all school years literature was my favorite subject.

I understand that reading books helps people in self-education and in solving different life problems. Teachers do not only teach their subjects. They develop their pupils intellect, form their views and characters, their attitudes to life and to other people.

It's a great responsibility. It's not as easy it may seem at first. But I think what love for children combined with the knowledge I'll get at the institute would be quite enough to succeed in my work. I'm applying to the Philological Department and I am sure my dream will come true sooner or later.
