

# Problems of teens in Finland

Giving the presentation: Victoria  
Balyuk and Ksenia Goloburdina

Not so long ago Finland was in the top ten of most drinking countries, but now the situation has changed for the better

As reported Scandi News, a recent European study among students showed that Finland is in first place in the number of Teens aged 15-16 who do not use alcohol or drugs

It is obvious that over the past decade, Finnish students started to live a more healthy lifestyle - in previous studies, Finland has always been in first place on teenage alcoholism. In Finland, the teenager will work better to buy a bike than a drug dose or a bottle of vodka

The Finnish health care system is unable to resolve a number of issues. For example, in Finland still is an issue of Smoking, even though Smoking in Finland, a much smaller number of people than in the whole Europe

Approximately 20-25% of young men and women aged 15 to 24 years smoke daily

Every year in Finland about a thousand pregnant adolescents up to 18 years, and 80 % of them get abortions on demand ones

We want these problems was less! We for a healthy way of life around the World!
