

Pros of Animal Testing

1. Animal testing has contributed to many life-saving cures and treatments.

2. Animals are appropriate research subjects because they are similar to human beings in many ways.

3. Animals often make better research subjects than human beings because of their shorter life cycles.

4. Relatively few animals are used in research, which is a small price to pay for advancing medical progress

5. Animals themselves benefit from the results of animal testing.
