

# PUBLIC TRANSPORT IN ALMATY

- In Almaty, the bus is the main means of transport for passengers not having their own transport. The longest bus route - N° 63.V 2011 were canceled benefits for public transport for students, students over 15, pensioners canceled free travel to the Interior Ministry. Instead, they were introduced nominal concessionary tickets. Pension ticket will cost 1500 tenge, Student - 2250, the school - 850.

---

The public transport system in Almaty is actually alright, despite what many local Kazakhs have told me. You can take the bus, trolley bus or tram almost anywhere in the city if you know what number to take. I myself only really use the buses, they cost 80 Tenge regardless of where you are going and you will either pay a conductor, the bus driver or a machine on the bus. Buses are usually quite busy and you will find yourself in cramped situations often, although there are times when they are empty. Also if you use buses you may want to look out for the hierarchy of who can sit. Generally if you are young there's no point sitting down on the bus.

- Features Almaty buses
- Striking feature of the city buses in Almaty is a special tradition of conductors that are at each stop off the bus (or leaning out of the open doors and windows) loudly announce further route. This is due to the effects of internal labor migration. In Almaty, a lot of other cities, every day, coming to work in other settlements of the region, and many new residents moving from other areas and know the bad town. This practice in other cities of Kazakhstan are largely met.

- 
- Also characteristic is the fact that at the beginning of the route buses "rubber" - traveling at 20 km / h, asserted at the station for 1-5 minutes or even 20 minutes, when a competitor starts "
  - Much of the route during peak hours is always packed rides, many bus stops do not stop because there is no room for new passengers.
  - In almost every bus there are "robbery" - so-called Pickpockets who work both alone and a few people, so tourists should be very careful.

- There is also the underground, which is pretty limited at the moment with perhaps six stations, but it is set to be extended in coming years.
- Anyway that's our evaluation of Almaty transport, but I have only been here for a short time(4years) and I am sure others can add more.

# TAXI IN ALMATY

---

<http://comfort-taxi.kazprom.net...>

- ❑ Taxis are not a luxury taxi rate
- ❑ Gone are the days when the taxi was considered a luxury and was popular phrase from the movie - "Our people, the bakery on the taxi ride." Every year more and more people prefer a taxi, as seen by members of our website statistics. What might be a luxury that people comfortably and quickly make it to work, to visit friends or to the station? Thank God that the rule is no longer considered a luxury and a taxi has become a common means of transport for a large number of people.

- If you came to the site in order to make a call - call a taxi, has a directory of the portal taxis, which collected information on taxi companies in Russia, Ukraine and Belarus. Easy navigation and search for a variety of parameters, allowing you to quickly find the phone and order a taxi.
- Travel by taxi in the city of Almaty and can comfort and pleasure, using the services of a taxi service from the company, "the commander TAXI"

We spent 3 weeks found out about a lot of taxis. In Almaty taxi ride is very popular and it is very Fidler theme. What is the minimum amount? and how you can quickly find a taxi? to all these questions, we found the answer. There are many different taxis but each of them is different. For example in some machines are comfortable, at one low price is the fastest taxi. Personally, my opinion is better to order a cab and do not notice the time and it seems that quickly reached. Here we presented our project, we hope to find out they did not know. Thank you!
