

ROSTOV ENAMEL

Fulfilled: To Zanina
Subgroup 2 3D

-
- Today Rostov Velikiy- is the only center for the production of enamel painting. ... At the end of the 19th century art of the Rostov enamel gradually transformed into a craft. Products Rostov masters filled the whole of Russia.

- Technology of production of enamel is not easy and needs a lot of experience. To manufacture requires copper plate, cut to size and shape of the future product. The metal is purified and put on a special enamel- glassy powder. The plate is then placed in a furnace and calcined. Enamel tightly fused with a plate and cover it with a thin layer. This operation is repeated several times to enamel covering plate durable and

It has long been known that folk arts - applied arts occupy in the life of our ancestors is not the last place. Russian people decorated their life different objects of decorative craft, using a variety of materials: wood, cloth, clay, glass, precious metals. Colorful shiny enamel poured into the recesses of metal products, giving gold and silver is even more rich and unique look.

- Beautiful decoration with enamel - brooches, earrings, bracelets, made in Russia for centuries.

- In the history of Rostov enamel there were ups and downs. However, thanks to a dedicated craftsmen who appreciate enamel patrons and enthusiasts, the art of miniature painting, Rostov enamel came to our days in its original form.
