

Solar System

Jupiter

- The fifth planet from our Sun and is located between Mars and Saturn. The mass of Jupiter is 317 times the mass of Earth and 2.5 times greater than the mass of all the other planets in the Solar System combined.

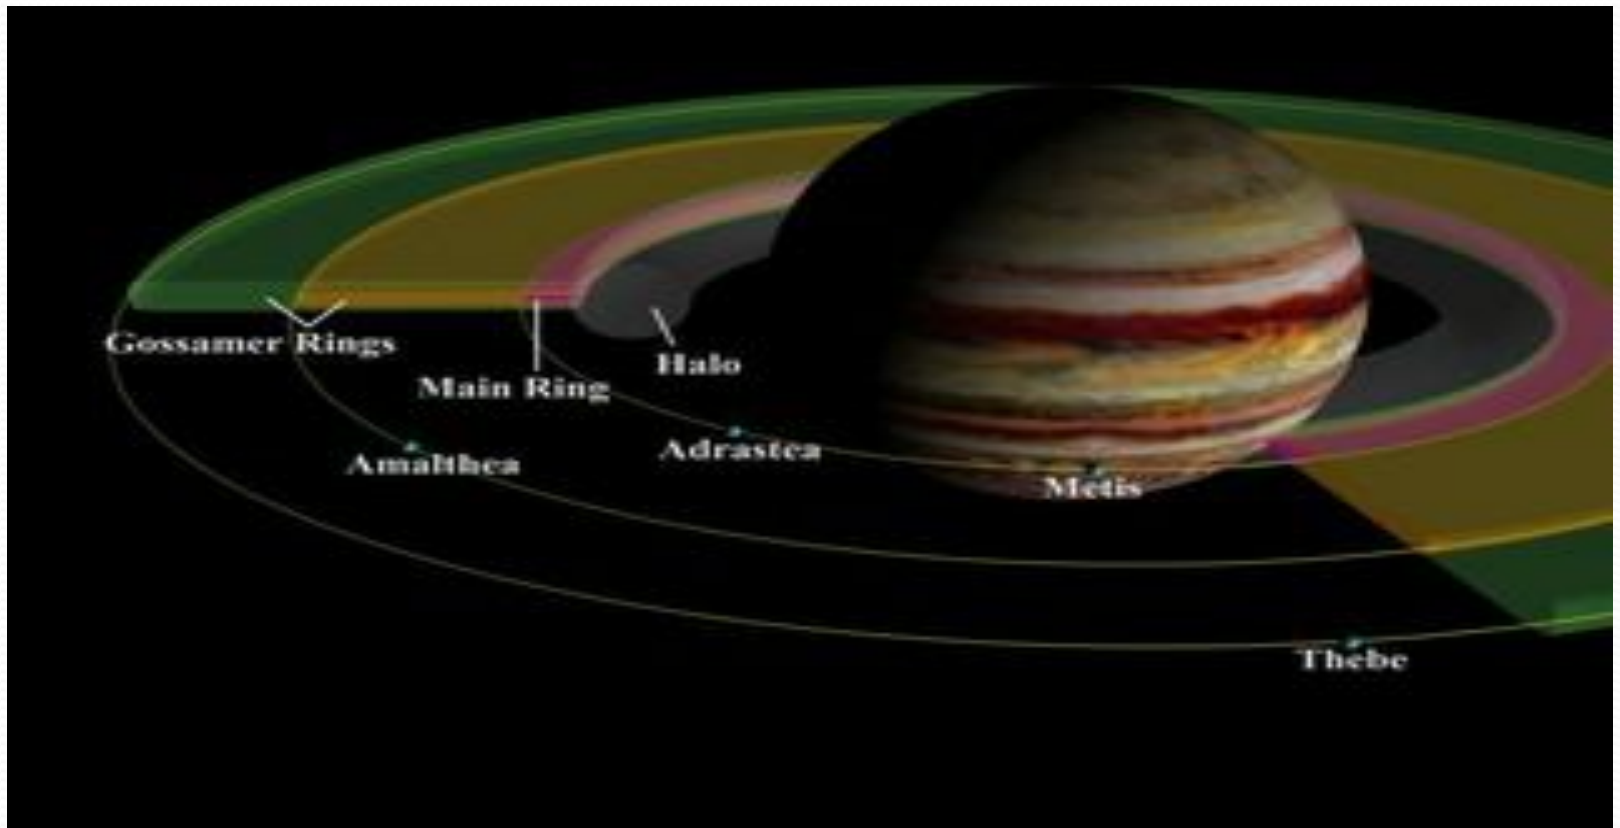

When you look at the night sky, the planet Jupiter be the third brightest object

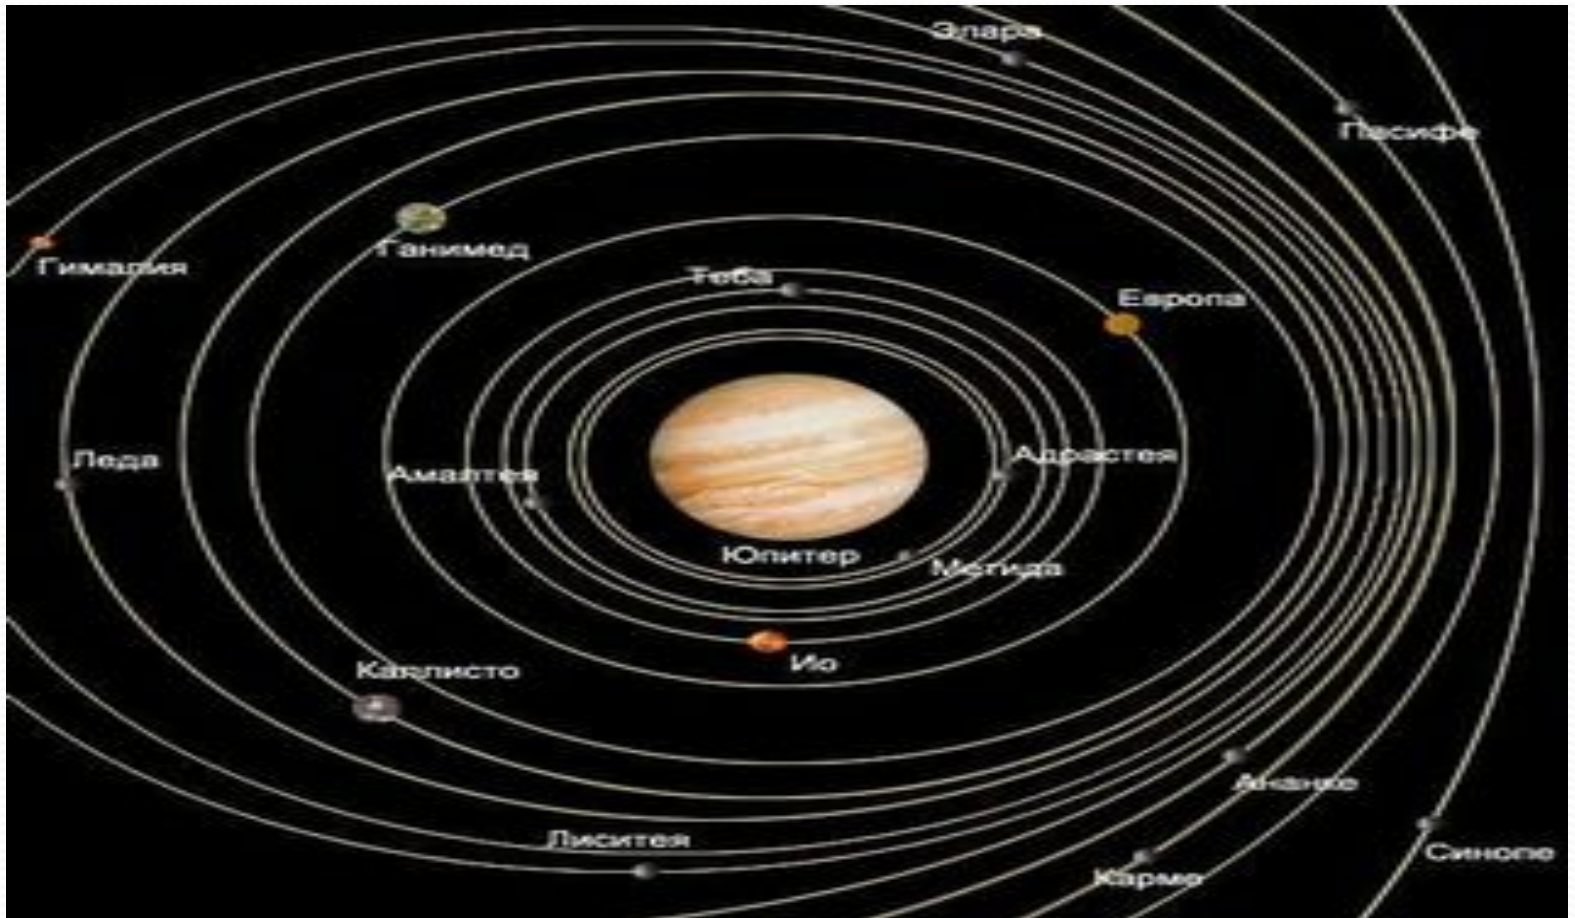

Symbolically it is denoted as follows:

- Jupiter has four rings. The most important of them- left after the collision of meteorites with 4 satellites.

- Jupiter has 63 satellites, four massive satellites (Io, Europa, Ganymede and Callisto)

● *Thanks)))*
