

The Future of our planet.

We are optimistic about the future.

As for us we are real optimistic about the Future of our planet.

- In 10 years people will take progress in different areas.

For example scientist will develop new computer electronic technologies.

- It will help us to solve urgent problems.

There will be great progress in medicine.

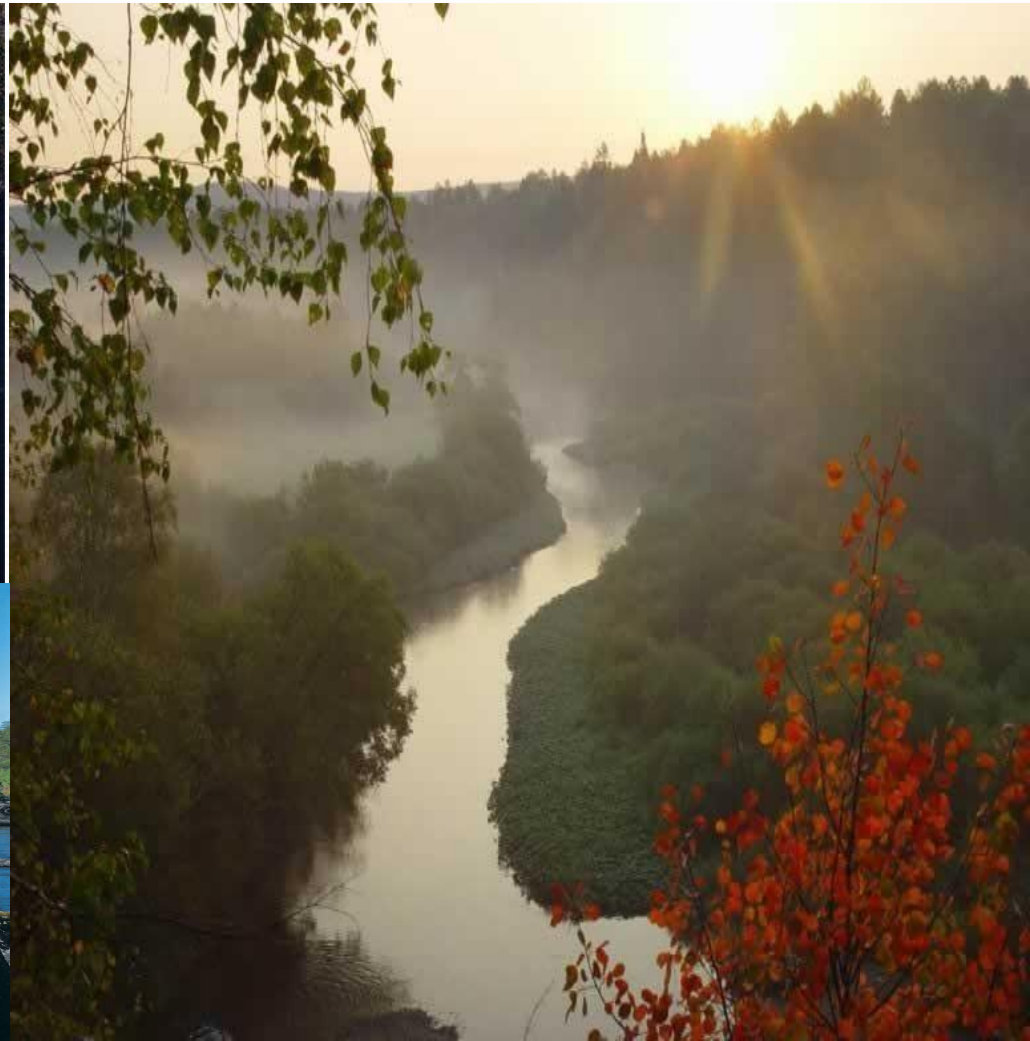

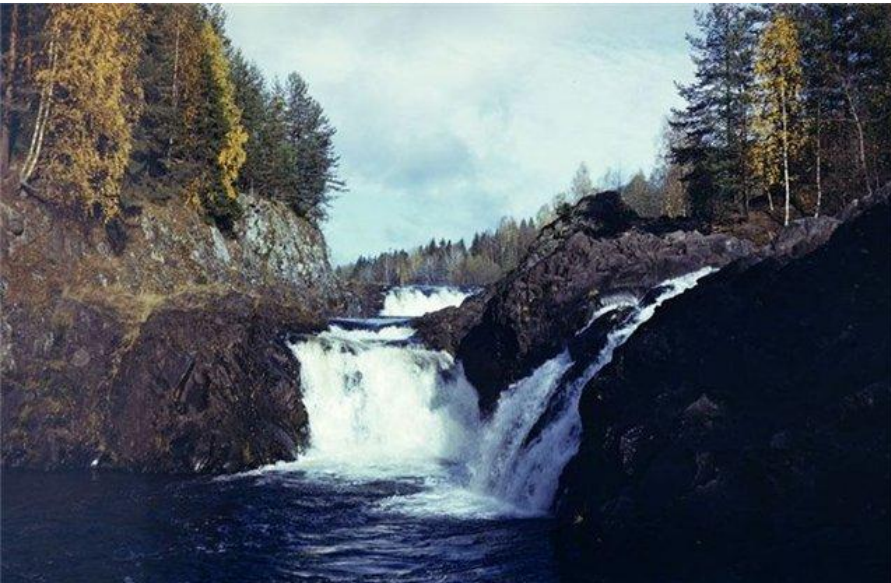

- Scientists will discover an effective cure for cancer, AIDS and other dangerous diseases.

In the future people will live better and aren't afraid about their health thanks to scientist developments in medicine.

It will be possible to solve ecological problems.

People also can endangered animals.

We can make our planet clean and green.

People will have a lot of opportunity to travel around the world.

In the future all technologies will be control the chips.
