# Costumes

- Costumes were bought from the military.

# Work of cameraman.

- Very poor performance of the operator, as such it is not. The only visual technique of the operator for the whole movie is filming a person walking person underneath.

# Work of actors

- Terrific acting. The film is saturated with mud and madness, the actors cope with the work by 5 points. Of course the main characters are the stars of the film. By the way, this film is the debut of Vladimir Yepifantseva.
