

The SAT

Scholastic Assessment Test

What the SAT measures?

- The SAT measures what students know and how well they use that knowledge. It tests the same things taught every day in high school classrooms: reading, writing and math.

- SAT questions represent high school curricula, testing skills in geometry, algebra, grammar and critical reading.
- Teachers and educators review every SAT question for relevance and coherence.
- The critical thinking skills that the SAT tests are 21st-century skills that will help you succeed in college.

How to prepare for the SAT

- Research is clear that cramming and short-term test prep aren't effective substitutes for hard work in school.
- To feel comfortable and confident on test day, it's a good idea to be familiar with the test format and question types.
- Like anything else in life, a little practice never hurts.

Inside the test

14

The height of a right circular cylinder is 5 and the diameter of its base is 4. What is the distance from the center of one base to a point on the circumference of the other base?

(A) 3

(B) 5

(C) $\sqrt{29}$ (approximately 5.39)

(D) $\sqrt{33}$ (approximately 5.74)

(E) $\sqrt{41}$ (approximately 6.40)

 Clear Answer

Mark for Review 

- The SAT looks like common test with choosing of answer. It's similar like Russian EGE. However, it is much easier.

A blue speech bubble containing the text "achieve more" in white lowercase letters. The word "achieve" is on the top line and "more" is on the bottom line, with a registered trademark symbol (®) to the upper right of the word "more".
