

Travelling

Many people travel every year. It is very popular now. Travelling by sea, by land or by air they can see many interesting places. Usually they travel for pleasure, but sometimes on business. They want to visit different parts of our country, make excursions to historical places, Hero-cities. First they book seats on a plane, a ship or a train. Then they can pack suitcases.

Train journeys are comfortable but long. That is why most passengers prefer planes. But if you want to enjoy fresh wind or take pictures of the places - choose a sea trip or hiking. As for me, I like to travel by car. You don't need tickets, you can stop everywhere and have a picnic. I think travelling is a very useful thing and I enjoy it very much.
