

# Юрий Алексеевич Гагарин

A collection of celestial bodies in space. In the center is Jupiter, a large planet with prominent horizontal bands of orange, red, and white. To its right is Saturn, a yellowish planet with a prominent ring system. Further to the right are two blue, spherical objects, likely moons or small planets. In the lower-left quadrant, there are several smaller, dimmer objects, including a reddish one and a white one, possibly representing other planets or moons. The background is a dark, black space.

«Считалочка»

$$10 - 8 = 2$$

$$13 - 1 = 12$$

$$8 - 7 = 1$$

$$17 - 7 = 10$$

$$9 - 5 = 4$$

$$10 + 2 = 12$$
