

Water pollution is very dangerous for our planet!

Don't waste fresh water!  
Only 3% of water on the Earth is fresh!

Waste water from  
factories pollute our  
rivers, lakes, seas.

Air pollution! The biggest sign of air pollution is smog!

All these gases are causing  
“greenhouse effect”!

Global warming will change the ecosystem and animals unable to adapt soon will die off.

A composite image featuring a realistic globe of Earth as the central focus. The globe shows continents in shades of brown and green, and oceans in deep blue, with white clouds scattered across its surface. Surrounding the globe are four hands of diverse skin tones—light, medium, and dark—reaching up from the bottom and sides to gently cradle the planet. The background is a dark, deep blue space filled with numerous small, bright white stars, creating a cosmic atmosphere. The overall composition is symmetrical and evokes a sense of global unity and environmental stewardship.

We must protect our planet!
